Error Log Tool Rights

Last Modified on 07/09/2025 1:19 pm CDT

The Error Log tool may be used by district and/or state system administrators to view recent activity and errors related to synchronization and messaging.

Users need R rights to view the tool and Generate Report, and D rights to Clear Log.

System Settings > Data Interchange Administration > Error Log

Suggested User Groups

Typically, users of this tool have already been assigned one or more **Product Security Roles** that grant administrative-level access; therefore, a user group assignment is not necessary. If your district's needs are different, you may choose to create a group that meets those needs.
