

# Arizona Ed-Fi Checklist for Starting the 2025-26 School Year

Last Modified on 12/14/2025 8:45 pm CST

[Configure Ed-Fi for the Next School Year](#) | [Process for Districts With 915 Approval](#) | [Ed-Fi Configuration Values By Year](#)

This article describes the steps to take to properly move Ed-Fi to the next school year. It also contains general recommendations for processes to complete at the end and beginning of the school year.

## Configure Ed-Fi for the Next School Year

This section describes the process necessary for configuring Campus to report Ed-Fi data for the next school year.

### Step 1. Update to Release Pack Campus.2523 or Later

In order to have the schema and logic in place for **AzEDS 11.0**, it is critical you update Campus to at least Release Pack Campus.2523 (June 2025) or higher. **Failure to do this may result in an inability to properly report data for the next school year.**

### Step 2. Create a New Ed-Fi Configuration for the Next School Year

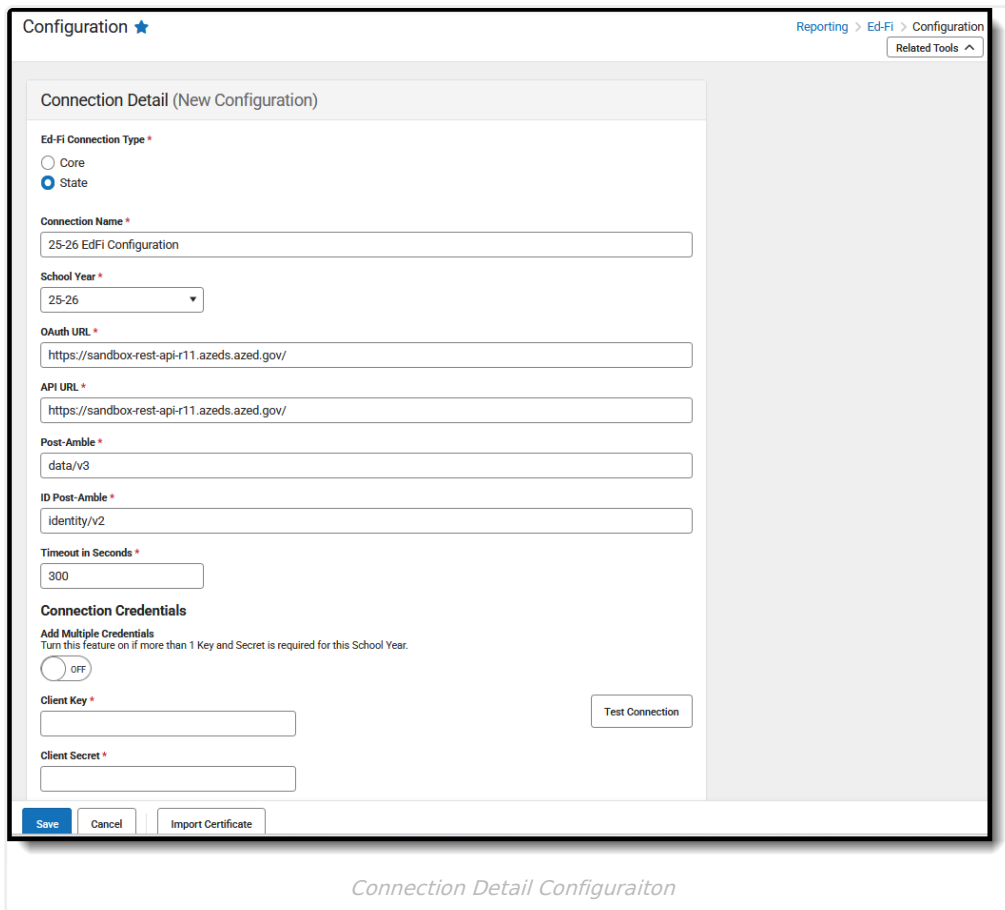

Create a new [Ed-Fi configuration](#) for the next school year. The image below shows the proper field entries for the Connection Configuration.

1. Click the **New** button. The Connection Detail editor displays.
2. Select the **Connection Type** of **State**.
3. Enter a **Connection Name** of **25-26 EdFi Configuration** or something similar.
4. Select the **School Year** of 2025-26. **This requires the 2025-26 [School Year](#) to be created.**
5. Enter the following values:
  - ▶ [Click here to expand...](#)

Field	Value
<b>O-Auth URL</b>	https://rest-api-r11.azeds.azed.gov/2026/
<b>API URL</b>	https://rest-api-r11.azeds.azed.gov/2026/
<b>Post-Amble</b>	data/v3
<b>ID Post-Amble</b>	identity/v2
<b>Client Key</b>	This is the same Client Key as the previous year's Ed-Fi configuration unless instructed differently by the Arizona Department of Education (ADE).
<b>Client Secret</b>	This is the same Client Secret as the previous year's Ed-Fi configuration unless instructed differently by the Arizona Department of Education (ADE).

Field	Value
<b>Timeout in Seconds</b>	This field defaults to a value of 60 seconds and determines (in seconds) the amount of time allowed to pass before the connection between Campus and Ed-Fi is considered timed out and Ed-Fi events are not processed. These Ed-Fi events are then reprocessed the next time a quartz job runs.
<b>Multiple Credentials</b>	<p>Turn this feature on when more than one Key and Secret is required for the school year.</p> <p>Sites that have multiple districts need to populate the District Number field in order for data to report correctly. The District Number field must be 9 characters in length. It is crucial that trailing zeroes are added to the number to make it 9 characters long. Any leading zeros are removed. For example, when the district number is 070280000, the leading zero is removed and the entered value is 702800000.</p> <div data-bbox="411 698 1396 1361"> <p><b>Connection Credentials</b></p> <p><b>Add Multiple Credentials</b> Turn this feature on if more than 1 Key and Secret is required for this School Year.</p> <p><input checked="" type="checkbox"/> ON</p> <p><b>Test Cred 1</b></p> <p><b>Credential Name *</b> Test Cred 1 <span>Test Connection</span></p> <p><b>Client Key *</b> [Redacted]</p> <p><b>Client Secret *</b> [Redacted]</p> <p><b>District Number</b> Complete only if the District Number for this connection is different than the State District Number or Ed-Fi District Number entered on the District Detail editor. 070280000</p> <p><b>Select Schools *</b>  <input type="radio"/> All Schools  <input checked="" type="radio"/> Select Schools         </p> </div> <p><i>Connection Credentials</i></p>

- Click the **Save** button.
- Click the **Test Connection** button to ensure configuration values were correct and a connection to Ed-Fi was made. A message of "Connection is Valid" displays when it is successful.

## Step 3. Go through the Ed-Fi Setup Checklist to Ensure Items are Complete

To ensure data is set up properly throughout Campus, review and/or update data based on the list below.

Turn OFF old Ed-Fi Configurations that are no longer being actively used.

[Resource Preferences](#) can now be mapped using the [Import Mapping](#) functionality to save time. Some resources are excluded.

Once complete, proceed to Step 4.

► [Click here to expand...](#)

Task	UI Location
Enable Ed-Fi functionality via the <a href="#">Enable Ed-Fi system preference</a> .	System Preferences > Enable Ed-Fi
Enter Ed-Fi Configuration values.	Configuration
Set all Resources to 'Off' and map the Ed-Fi Codes to Campus Codes via the <a href="#">Ed-Fi Resource Preferences</a> .	Configuration > Resource Preferences
Assign <a href="#">Ed-Fi IDs</a> .	Demographics > Person Identifiers
Set <a href="#">tool rights</a> for Ed-Fi.	User Group Information > Tool Rights

Task	UI Location
Set <a href="#">Days Per Week</a> value on all reportable calendars.	Day Setup
Set <a href="#">Calendar Dates</a> on all reportable calendars <ul style="list-style-type: none"> <li>Instructional Days report based on the Instruction checkbox on each date; all other events report from the Day Events droplist dictionary values.</li> </ul>	Day Setup
Set <a href="#">Term Descriptor Override</a> on Course Sections.	Section Information
Set the <a href="#">Ed-Fi Relation Type</a> .	People Setup > Relationship Type
Set the <a href="#">Ed-Fi Transcript Term Override</a> for all manually added transcripts.	Transcripts > New > Ed-Fi Transcript Term Override
Add a <a href="#">Room</a> to all Course Sections for state-reporting courses.	Section Information
Add an <a href="#">Instruction Setting</a> on Course Sections.	Section Information
Add a <a href="#">Level</a> to a Course, if applicable.	Course Information
Add a <a href="#">Teacher Role</a> on Staff History for teachers who need to report to Ed-Fi.	Section Staff History
Toggle Resources to 'On' in <a href="#">Ed-Fi Resource Preferences</a> once all data setup is complete.	Configuration > Resource Preferences

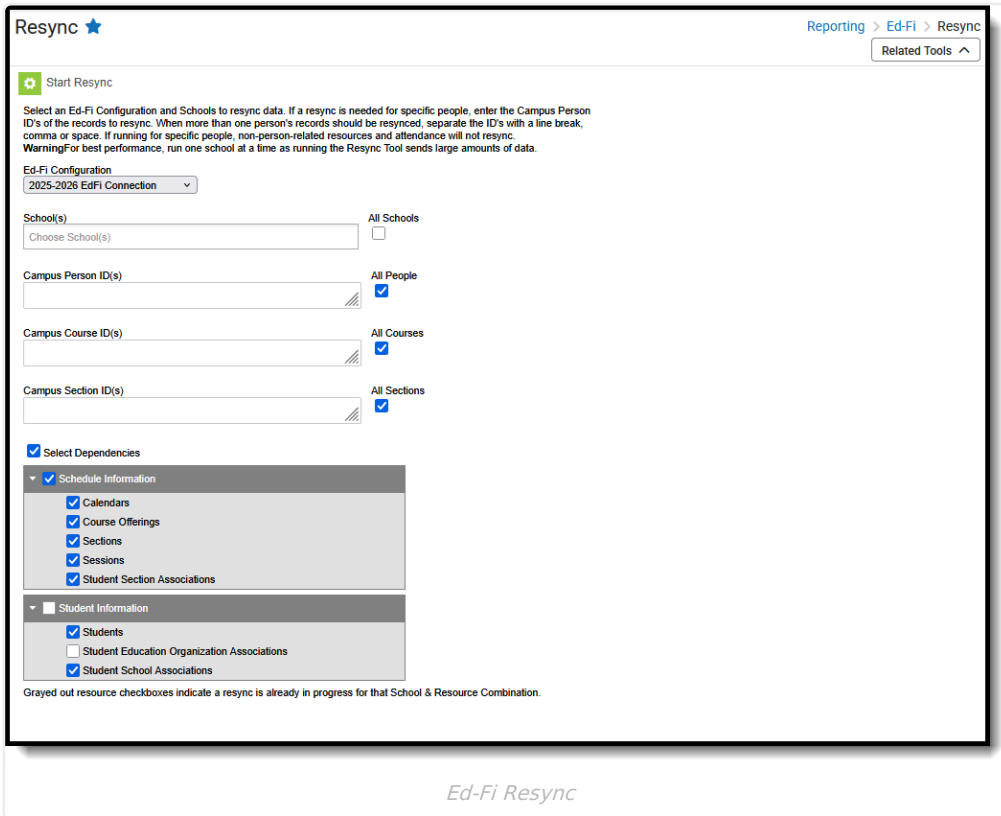

## Step 4. Perform an Ed-Fi Resync for the Next Scope Year

Now that the next school year's Ed-Fi configuration is in place and data has been properly reviewed, use the [Resync](#) tool to resync Ed-Fi data.

1. Verify the 2025-26 is selected in the toolbar.
2. Select the 2025-26 Configuration option from the Ed-Fi Configuration dropdown.
3. All schools, all Person IDs, all Course IDs and all Course Section IDs need to be resynced for the next year. Mark the All Schools, All People, All Courses and All Sections checkbox.
4. Mark the **Select Dependencies** checkbox to ensure related data is sent properly and complete. Review the [Recommended Resync Order](#) for guidance on when to sync each resource. The options marked in the [Ed-Fi Resource Preferences](#) tool determine which options are available for selection here.
5. Mark the checkbox next to each data set that should be resynced and enter the appropriate dates and mark the desired resources.
6. Select the **Start Resync** button. Data begins resyncing between Campus and AzEDS.

This action generates a large volume of items in the event queue, so it may be helpful to plan the resync

for an off-peak time period and resync in groups of calendars rather than all calendars.

## Process for Districts With 915 Approval

For those who have been granted 915 approval, the Ed-Fi configuration for the previous school year needs to be added back and data resynced.

Repeat Step 2 and Step 4, changing the 2025-26 configuration and school year to 2024-25 configuration and school year. Once the resync is complete on the previous year, that configuration can be deleted.

## Ed-Fi Configuration Values By Year

Year	O-Auth URL	API URL	Post-Amble	ID Post-Amble
2025-26	https://rest-api-r11.azed.gov/2026/	https://rest-api-r11.azed.gov/2026/	data/v3	identity/v2
