

Ad hoc Deactivated Elements Impact Report and Element Replacement Wizard Tool Rights

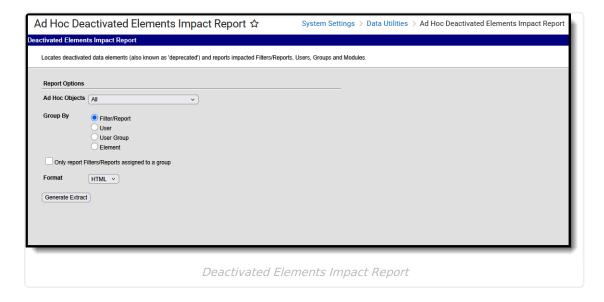

Last Modified on 12/14/2025 8:45 pm CST

The <u>Deactivated Elements Impact Report</u> and the <u>Element Replacement Wizard</u> help keep Ad hoc filters accurate by identifying data elements that have been removed and replacing them with equivalent options.

Deactivated Elements Impact Report Tool Rights

The Deactivated Elements Impact Report lists which user-created Ad hoc Filters and Reports have been affected by elements that have been deactivated. Deactivated elements are fields that are no longer in use but kept for historical reporting purposes.

See the <u>Deactivated Elements Import Report</u> article for details on generating the report.

Available Tool Rights - Deactivated Elements

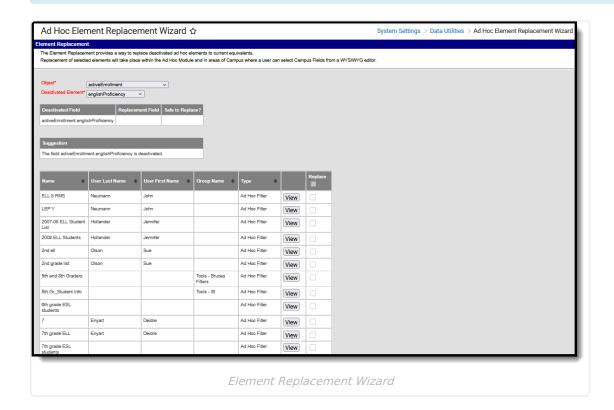

| R | w | A | D |
|---|-----|-----|-----|
| Access the report.Generate the report. | N/A | N/A | N/A |

Element Replacement Tool Rights

The Element Replacement tool allows users to replace deactivated Ad hoc fields with the current field equivalent within <u>Ad hoc filters</u>, <u>Ad hoc Letter</u> templates, <u>Behavior Letter</u> templates, <u>Attendance Messenger</u>, <u>Attendance Letters</u>, and Messenger templates.

See the **Element Replacement** article for details on generating the report.

Available Tool Rights - Element Replacement

Suggested User Groups

Typically, users of these tools have already been assigned one or more Product Security Roles that grant administrative-level access; therefore, a user group assignment is not necessary.

If your district's needs are different, you may choose to create a group that meets those needs.

| See <u>User Groups and Suggested Roles</u> for more information. | | | |
