The **Portal Display Options** allow schools to determine which tools and data are available in the Campus Student and Campus Parent Portals. This tool is scoped to the school selected in the Campus toolbar.

See the [Portal Display Options](#) article for details on the Portal Display Options tool.

The screenshot shows the 'Portal Display Options' configuration interface. At the top, there's a breadcrumb trail: 'System Settings > Portal Preferences > Portal Display Options'. Below this, a blue box explains that display options determine what tools and data appear in the Campus Student and Campus Parent Portals, and are set by Calendar/Structure using a Display Options Template. It notes that each Calendar/Structure can be assigned to only one template and provides a 'Read More' link.

Below the explanation, there are two filter sections: 'Filter Calendars by School Year' with buttons for 'All', 'Previous Year', 'Active Year', and 'Future Year'; and 'Filter Calendars by Status' with buttons for 'All', 'Enabled', and 'Disabled'.

The main content area is titled 'Display Options Template' and shows 'School: High School' and 'Template: High School'. It includes a 'Template Name' field with the value 'High School' and a 'Description' field. Below these is a section 'Calendars Assigned to the Template (1)' with a plus icon to add more.

The 'Display Options' section allows enabling tools and selecting display options for both the Campus Student and Campus Parent Portals. It features 'Expand All' and 'Collapse All' buttons. A table lists various tools with checkboxes for 'Student' and 'Parent' visibility, and a plus icon for each row.

Suggested User Groups

Typically, users of these tools have already been assigned one or more Product Security Roles that grant administrative-level access; therefore, a user group assignment is not necessary.

If your district's needs are different, you may choose to create a group that meets those needs.

See [User Groups and Suggested Roles](#) for more information.
