Tool Search: Application

Applications are central to the Open Enrollment process. Parents or guardians of the students complete the applications, indicating their preferred choices for the student's school and ranking them from first to last choice.

Typically, a series of questions is asked for each choice to assist the district in determining which rules apply to that choice for the applicant. These responses are reviewed to ensure accuracy and to assign the appropriate weight to the applicant's answers.

Address information, parent contact details, and student demographics usually form part of the application. The district processes these applications and incorporates them into the application pool, awaiting the next step in the process, which is generally the Lottery.
