

Section Student Detail (California)

Last Modified on 12/14/2025 8:45 pm CST

Tool Search: Section Student Detail

The Section Student Detail tool provides a location where districts can collect course-related state reporting data for individual students in a course section. This data is not scheduling-related and can include both localized state reporting data elements provided by Campus (for example, Dual Credit) and custom District-Defined data elements created by a district administrator.

The fields listed below are specific to the state of California. For additional information about this tool, see the core [Section Student Detail](#) article.
