Since generating a report doesn't add or change existing data, **only Read rights are required. Write/Add/Delete rights, if granted, have no impact.** This article includes screenshots of the Attendance report tools and generated reports, along with summaries of their intended uses.

See the [Attendance Office Reports](#) to learn how to use these reports.

Attendance Reports and Assigned Tool Rights

Some information, such as Social Security numbers, may not display on a report if the person generating the report doesn't have rights to view it. Users require Calendar Rights that determine the years and schools for which they can generate reports.

Average Daily Membership (ADM) & Average Daily Attendance (ADA) Summary with Student Detail

This report displays Membership, Absent, and Present Days and calculates ADM and ADA. ADA calculation options use either Exact (Present Minutes divided by Student Day Minutes for the Calendar) or Whole/Half (Absent Minutes compared to Whole Day and Half Day Absent Minutes for the Calendar) logic. The Summary version displays data for each Calendar/Grade selected and as a grand total for all Calendars; the Detail version displays the Summary data plus a row for each student actively enrolled during the entered date range. Blank Start and End Dates default to the start/end dates of the calendar. This is a very complex report; try to limit the number of calendars run per batch.

This report is used to audit attendance populated from a behavior resolution. There are three sections:

- Behavior Resolutions without a selected corresponding Attendance Code, which displays days where there should be an attendance code populated from a behavior resolution.
- Attendance without any corresponding Behavior Resolution, which displays days where there is a behavior-linked attendance code but no behavior resolution.
- Attendance created from a Behavior Resolution, which displays days with an attendance code populated from a behavior resolution.

Funding Report

This report prints district-level summaries of membership and attendance for funding. The count on this report will not include students flagged as No Show or State Exclude on their enrollment.

If "Count date" is selected as the "Membership Method" and "Primary Enrollment only" is selected as the "Concurrent Enrollment Method", a student will only be counted in 1 school.

The Enrollment Overlap Filter is used to prevent the state from double paying a district on a student that has bad enrollment data. The first option should exclude any day where the student has an overlapping primary enrollment. If the overlap occurs on the count date, the student will be filtered from the aggregate. If the student has > 100% enrolled on any day, those days are also filtered. The second option should completely filter the student out of the calculations given any of the error conditions above.

Attendance Period Count Report

This report counts attendance marks per student. The Report Type option determines how attendance marks are summed:

- Total Count sums all values for all periods and determines if those totals meet the values entered in the Having at Least/Having at Most fields.
- Count by Period sums the attendance marks for each period and reports values based on the Having at Least/Having at Most fields.

For example, Report Type of Total Count with Having at Most zero attendance marks would return all students with attendance marks over the start and end date range. Report Type of Count by Period with Having at Most three would return periods where students only had three absences. Selecting at the results to only include those attendance events which match the selected items. For specific attendance Excuse Codes.
