

SIF Unity (Maine)

Last Modified on 05/08/2026 8:05 am CDT

This article provides information about SIF (Unity) for Maine, including object information and related tooling.

SIF is a standard for data interchange that allows two separate information systems to communicate with each other. SIF sets a standard messaging language and format that defines data objects commonly shared across student information systems and applications.

As long as both applications conform to the same SIF data interchange standards (such as those set by SIFA), communication between two systems designed by entirely separate vendors is possible.

SIF Unity tools are only available for SIF v3.6 or higher.

Note: Maine users do not need to import a certificate.

SIF Object Information

The table below provides details of each object used in Maine SIF (Unity).

Object	Link to Document
Discipline Incident	Discipline Incidents 
LEA Info	LEA Info 
School Info	School Info 
Student Participation	Student Participation (May 2026)  <div data-bbox="611 1449 1067 1673" style="border: 1px solid #ccc; padding: 10px; margin-top: 10px;"> <p>Note: In order for FRAM records to report, the Alternative Economic Form checkbox must be marked. This checkbox must be manually checked for records added via the Import Wizard.</p> </div>
Student Personal	StudentPersonal 
Student School Enrollment	Student School Enrollment
