

# Academic and Graduation Programs - State Edition

Last Modified on 10/14/2025 1:28 pm CDT

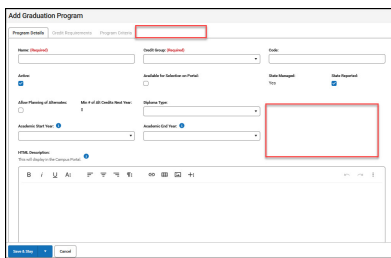

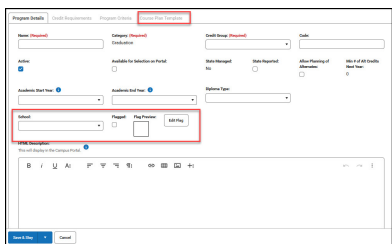

Tool Search: Academic and Graduation Programs

The **State Edition Academic and Graduation Programs** tool gives State Edition Users (e.g. Curriculum Directors) more functional options to manage their State Academic/Graduation Plans. These options facilitate standardization of plans for students in a state.

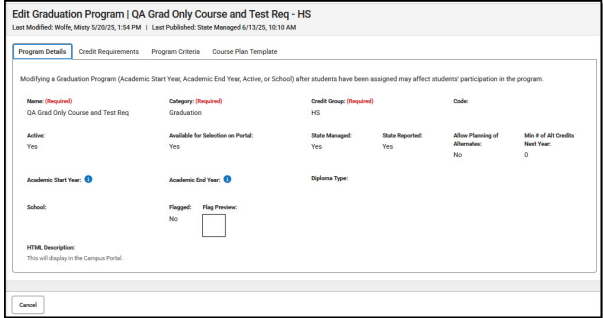

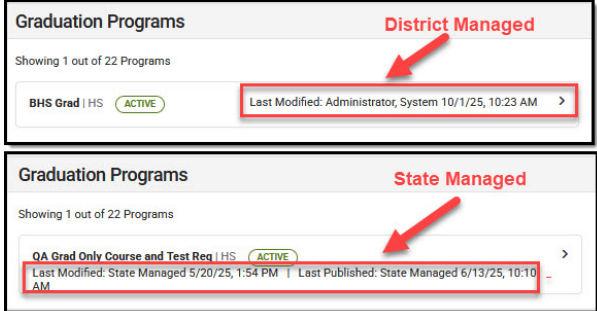

This tool is currently only available in North Carolina.

## State Edition View vs District Edition View

The tools at the State and District level have similar capabilities, with the following exceptions:

When creating new programs...	State Edition View	District Edition View
<ul style="list-style-type: none"> <li>Users creating programs at the State level do not see the <b>School and Flagged</b> fields in Program Details.</li> <li>Users creating programs at the State level do not currently see the <b>Course Plan Template</b> tab</li> </ul>		

After a State Managed Program has been published to Districts:

Users at the District level...	District View
<ul style="list-style-type: none"> <li>• <b>Cannot</b> change information on any tabs for a Program pushed down from the State (accessibility features will let non-sighted users know when a field is read-only)</li> <li>• <b>Cannot</b> populate School and Flagged fields in Programs pushed down from the State</li> <li>• <b>Cannot</b> change compound requirements set by the State</li> <li>• <b>Can</b> see and populate the Course Plan Template tab on Programs pushed down from the State</li> </ul>	
<ul style="list-style-type: none"> <li>• Will see "State Managed" in the summary information indicating when a State Managed program was published or modified.</li> </ul>	

See the [Academic and Graduation Programs Tool Rights](#) and [Course Management Tool Rights](#) articles for information on rights needed to use this tool.

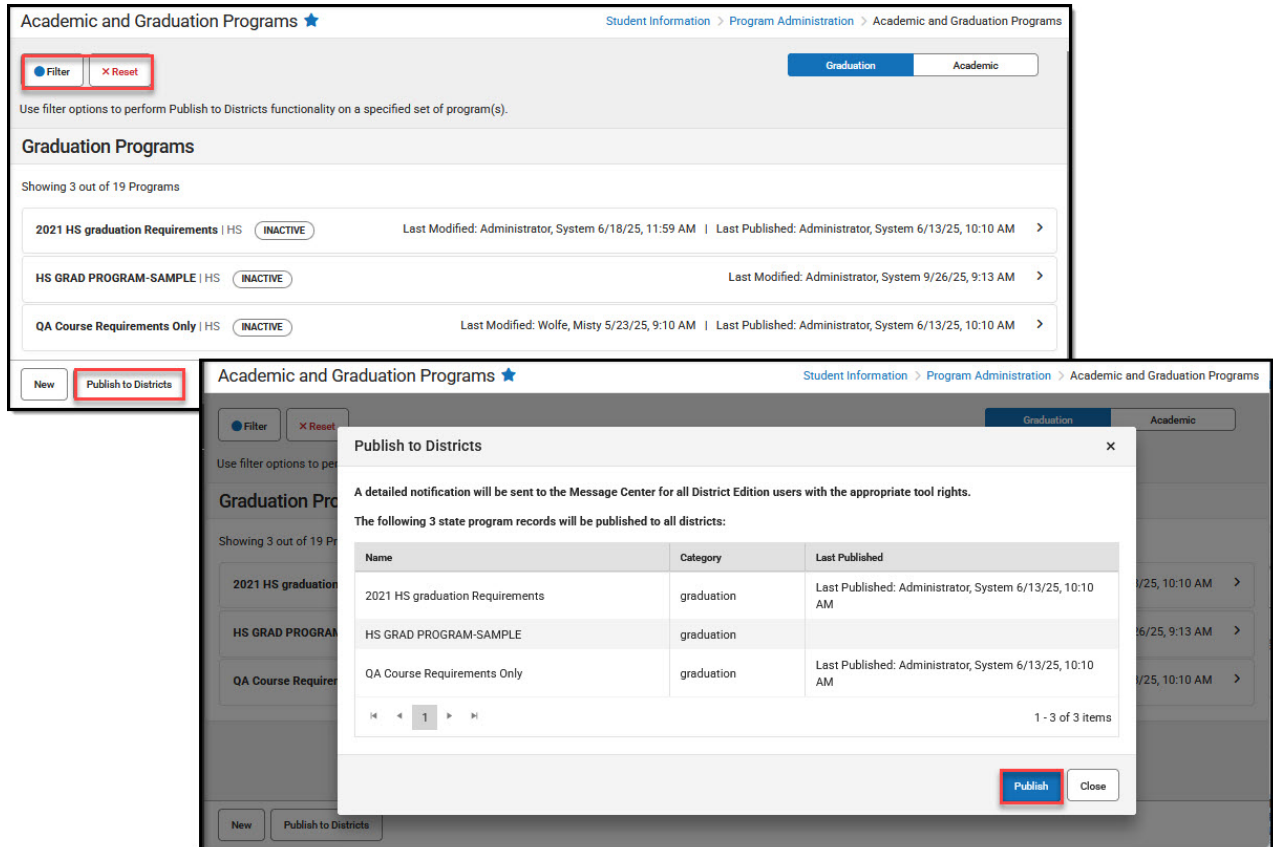

# State Managed Academic and Graduation Programs

## Create State Managed Program

- See the core articles detailing how to [Add an Academic Program](#), [Add a Graduation Program](#), and [Manage Existing Programs](#) for instructions regarding how to create and maintain these programs.

- State level users will not see the **Course Plan Template** tab. State Managed programs will not include Course Plan Template information.

## Publish to Districts

The screenshot shows the 'Academic and Graduation Programs' interface. The 'Graduation' tab is selected. A 'Filter' button is highlighted with a red box. Below the filter options, a list of graduation programs is shown, including '2021 HS graduation Requirements', 'HS GRAD PROGRAM-SAMPLE', and 'QA Course Requirements Only'. The 'Publish to Districts' dialog box is open, displaying a table of the selected programs to be published.

Name	Category	Last Published
2021 HS graduation Requirements	graduation	Last Published: Administrator, System 6/13/25, 10:10 AM
HS GRAD PROGRAM-SAMPLE	graduation	
QA Course Requirements Only	graduation	Last Published: Administrator, System 6/13/25, 10:10 AM

The dialog box also includes a 'Publish' button (highlighted with a red box) and a 'Close' button.

1. Select **Publish to Districts** to publish all programs to all districts, or use Filter to narrow results to specific programs to be published.
2. Select **Publish** to publish the selected programs to all districts.
3. A notification will be sent to the **Message Center** for District Edition users with appropriate tool rights.

## Message Center - District Edition Users

When programs are published to districts, a notification is sent to the Message Center at District Edition. A quartz job runs overnight and sends the message to the District Edition users who have appropriate tool rights. District users will need tool rights to [Academic and Graduation Programs](#) as well as [Course Management](#) if they are to get Message Center messages about updates.

The notification is considered a State Notification and looks similar to this.
