

Review and Certify a Data Certification Event

Last Modified on 08/29/2025 10:54 am CDT

Tool Search: Certification Event

Data certification events are created to validate and ensure that a school or district's data is accurate and ready for the state to generate reports and funding using it. Each data certification event typically targets a specific dataset (such as attendance, behavior, Special Ed, etc.) and assigns a related certification category to the event.

For example, the state might publish an event targeting 504 compliance data and tie a Special Ed or 504-specific certification category to the event. This ensures only users at the school or district assigned to this category are allowed to review and certify the event (staff members responsible for this type of information), and state-level users assigned to this category are allowed to certify and approve the data (state-level members who understand this type of information).

When the state publishes an event, school and district users tied to the category assigned to the event are notified of its publication and should begin reviewing and certifying their data.

Data Certification tools are only available for districts connected to a State Edition of Campus that have purchased the [Campus Data Suite](#).

Prerequisites

- In order to review an event, the event must be published to the districts/schools, and you can only certify the event if the certification window is open.

This tool requires full rights (read, write, add, delete) for all reviewers and certifiers.

- Although Reviewers have full tool rights, they can only view event data.
- Certifiers can view the data and take actions on the event (Submit Certification to State or Request Recertification from State)

Review and Certify Data

Once reviewers and certifiers are properly added to data certification categories, they can begin reviewing and certifying data certification events as they are published down from the state.

1. Each reviewer and certifier for an event will receive a message in their [Message Center](#) informing them of a new event that requires their attention.

Message Center ☆ My Account > Communication > Message Center

Message Center contains District Announcements, School Announcements and Process Alerts. The classroom message feature is available in Instruction > Overview > [Classroom Messenger](#).

District Announcements +

School Announcements -

No district announcements at this time.

Validate Data in State Database

Process:

- Run validation reports outlined below
- Verify all data contained within the report to ensure accuracy
- If data in report does not match output from Step One:
 - Determine which data points are missing
 - Wait for recently updated data to sync to the state OR use the batch resync tool to resync the data
- Any errors listed as Fatal need to be fixed before moving on to Step Three
- Repeat steps above until data is correct

Report Title	Queued Time ↓	Status
Student Tardiness DC 96.0.2	07/30/2025 1:01:55 PM	COMPLETED

1 - 1 of 1 items

Refresh

8. Verify that all the data in the report is accurate. If data is inaccurate and does not match data from the previous step (school or district data):
- Determine which datapoints are missing
 - Wait for the recently updated data to sync to the state
- OR**
- Use the [Batch Resync tool](#) to resync your data to the state

- d. Correct any Fatal errors
- e. Repeat these steps until all data is correct.

9. Once all state data is accurate, click the **Next** button.

NOTE: You must view the report before you are allowed to move on to the next step.

10. You now need to review the state data snapshot. This snapshot of the state database will be used for submission for this event. You are verifying that the data is accurate, and the state should use this dataset for certification.

The state may have already created a snapshot, and you simply need to review the data. In this instance, click the **Review State Snapshot** button. The report will appear in the Report/Snapshot Results queue below.

Refresh

13. If you think the snapshot's data is incomplete or outdated, click the **Retake State Snapshot** button and review the report once it is ready.
14. Verify all the data within the snapshot is accurate, and if it is not, repeat steps 1 - 9 above and retake a new snapshot. If data is complete:
 - If you are a **Reviewer**, your job is complete. You have reviewed the data, and you can click **Close**.
 - If you are a **Certifier**, you should select **Next** to move on to Step 15 below.
15. Verify all three validations show a status of Completed, and if so, click **Submit Certification to State**.

Student Tardiness

District Validation State Validation Snapshot Validation Certify and Submit

Certify and Submit to State

Process:

- Verify that all items below show Completed
- Click Submit Certification to State

VALIDATION TYPE	STATUS
District Validation	COMPLETED
State Validation	COMPLETED
Snapshot Validation	COMPLETED

Previous Cancel Submit Certification to State

The event will show a User Status of Certification Complete for the user who submitted certification and an Event Status of Certification Sent to State. The state will receive notice of

the certification and will review and approve the event for your school/district.
