This tool is available as part of the Campus Learning premium offering.

Tool Search: Section Feed Administration

A Section Feed is the collection of communications for a section. The feed consists of posts and their replies. Teachers can create posts and replies; students' communication options depend on the Section Feed Settings but may include posting, replying, and uploading attachments.

The Section Feed Administration tool allows administrators to review existing section feeds, including addressing flagged posts.

Section Feed Administration provides access to view and interact with all Feeds at the School.

The **Section Feed Administration** tool rights in Instruction > Settings grants full access to that tool. There are no specific tool rights needed for teachers to access Section Feeds. The tool is visible to teachers if it is enabled for any Portal users (parents and/or students).

See the Instruction Tool Rights article for more information.

View a List of Feeds

By default, this tool displays sections that have **flagged posts/replies**. Toggle **Only Show Feeds with Flags** to *Off* to view all feeds for the School selected in the Campus Toolbar.

For each section, the number of **Posts/Replies** and the number of **Flagged Posts/Replies** are shown. Enter text in **Filter By Section** to filter the list to sections with that text in the name.

Actions

- Click **View** to view a section's Feed.
- Participate in the conversation.
- Resolve flags.
