

Enable Section Feed

Last Modified on 07/01/2025 4:10 pm CDT

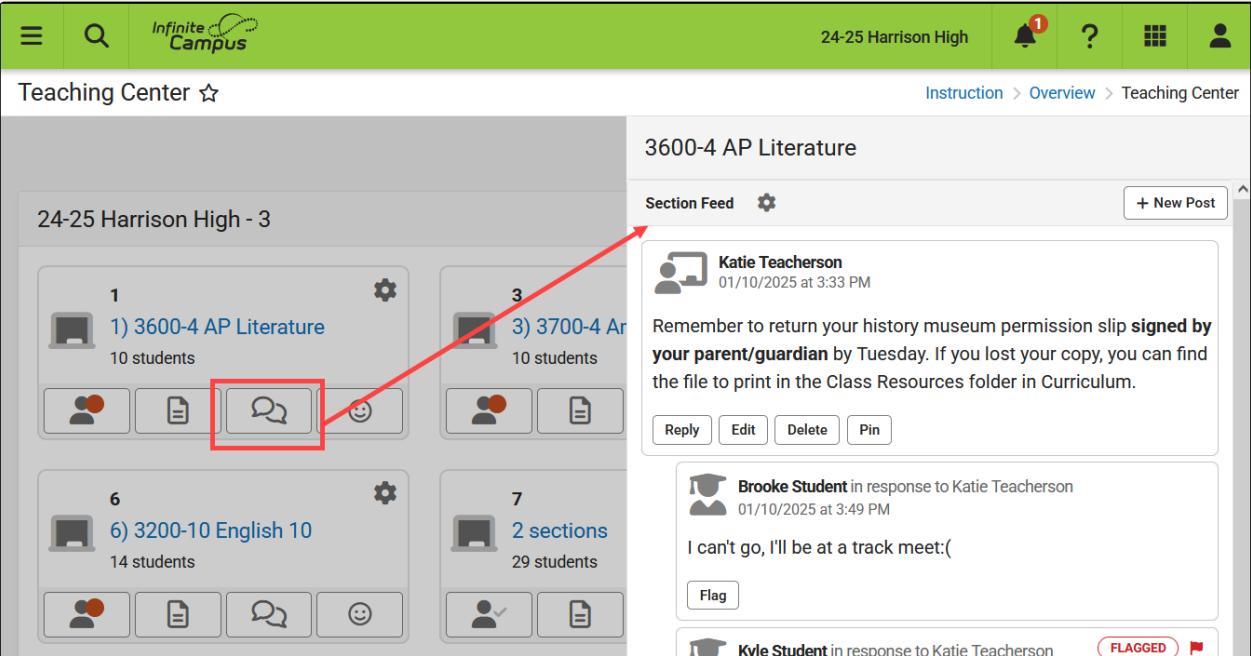

[In Portal Display Options](#) | [In CDR](#) | [Section Feeds in Campus Student/Parent](#)

This tool is available as part of the [Campus Learning](#) premium offering.

Location: Teaching Center > Click the speech bubble icon

A Section Feed is the collection of communications for a section. The feed consists of posts and their replies. Teachers can create posts and replies; students' communication options depend on the Section Feed Settings but may include posting, replying, and uploading attachments.

To view a section's feed, click the speech bubbles icon in the Teaching Center. A Section Feed side panel displays.

The screenshot shows the Infinite Campus Teaching Center interface. On the left, a list of classes is displayed: 1) 3600-4 AP Literature (10 students), 2) 3200-10 English 10 (14 students), 3) 3700-4 Ar (10 students). The speech bubble icon in the first class's row is highlighted with a red box and an arrow pointing to the Section Feed panel on the right. The Section Feed panel shows a post from Katie Teacherson: "Remember to return your history museum permission slip **signed by your parent/guardian** by Tuesday. If you lost your copy, you can find the file to print in the Class Resources folder in Curriculum." Below it is a reply from Brooke Student: "I can't go, I'll be at a track meet:(". A third post from Kyle Student is partially visible. The top right of the panel shows a '+ New Post' button.

The Section Feed allows a teacher to communicate with students and parents in a class.

There are no specific tool rights needed for teachers to access Section Feeds. The tool is either turned on for a district or not. For administrators, the **Section Feed Administration** tool rights in [Instruction > Settings](#) grants full access to that tool.

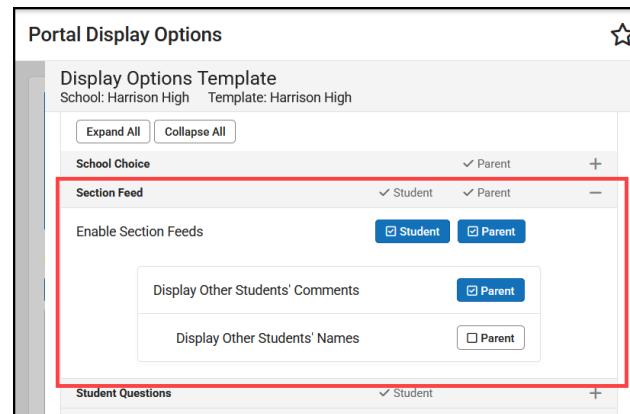

See the [Instruction Tool Rights](#) article for more information.

Tool Search: Portal Display Options

Section Feeds are available for all teachers. For students and parents to see Section Feeds, the tool must also be enabled in [Portal Display Options](#). These options are managed by school/district personnel, not by teachers.

Section Feeds can be enabled for students and parents separately. If Parent is enabled, an additional option controls whether parents can see comments from other students in the class and whether those students' names display with their comments.

Enable Section Feed in Digital Repository Preferences

To allow teachers and students to upload Campus Digital Repository files in Section Feed post and replies, enable **Section Feed** in the [Digital Repository Preferences](#).

Section Feeds in Campus Student/Parent

Once enabled, students and parents view the Section Feed by clicking the name of the course anywhere in Campus Student or Campus Parent. The Section Feed displays in the Classroom tab with the other course information.

The screenshot shows the Infinite Campus interface. On the left, the 'Student Profile' is displayed with a 'Today's Schedule' for '24-25 Harrison High'. The 'Term 3' schedule shows one class: 'AP Literature' from 8:40 AM to 9:35 AM. A red box highlights the 'AP Literature' course name. A red arrow points from this highlighted text to the 'Classroom' tab on the right. The 'Classroom' tab is active, showing the 'Section Feed' for 'AP Literature'. The feed contains a message from 'Katie Teacherson' about returning a history museum permission slip, with a 'New' badge. Below the feed, 'Class Info' is shown, listing 'Course: 3600 AP Literature' and 'Section: 4'. There is also a 'Teacher' section.

In Campus Student or Parent, click the Course Name to view the Section Feed.
