

# Behavior Settings Tool Rights

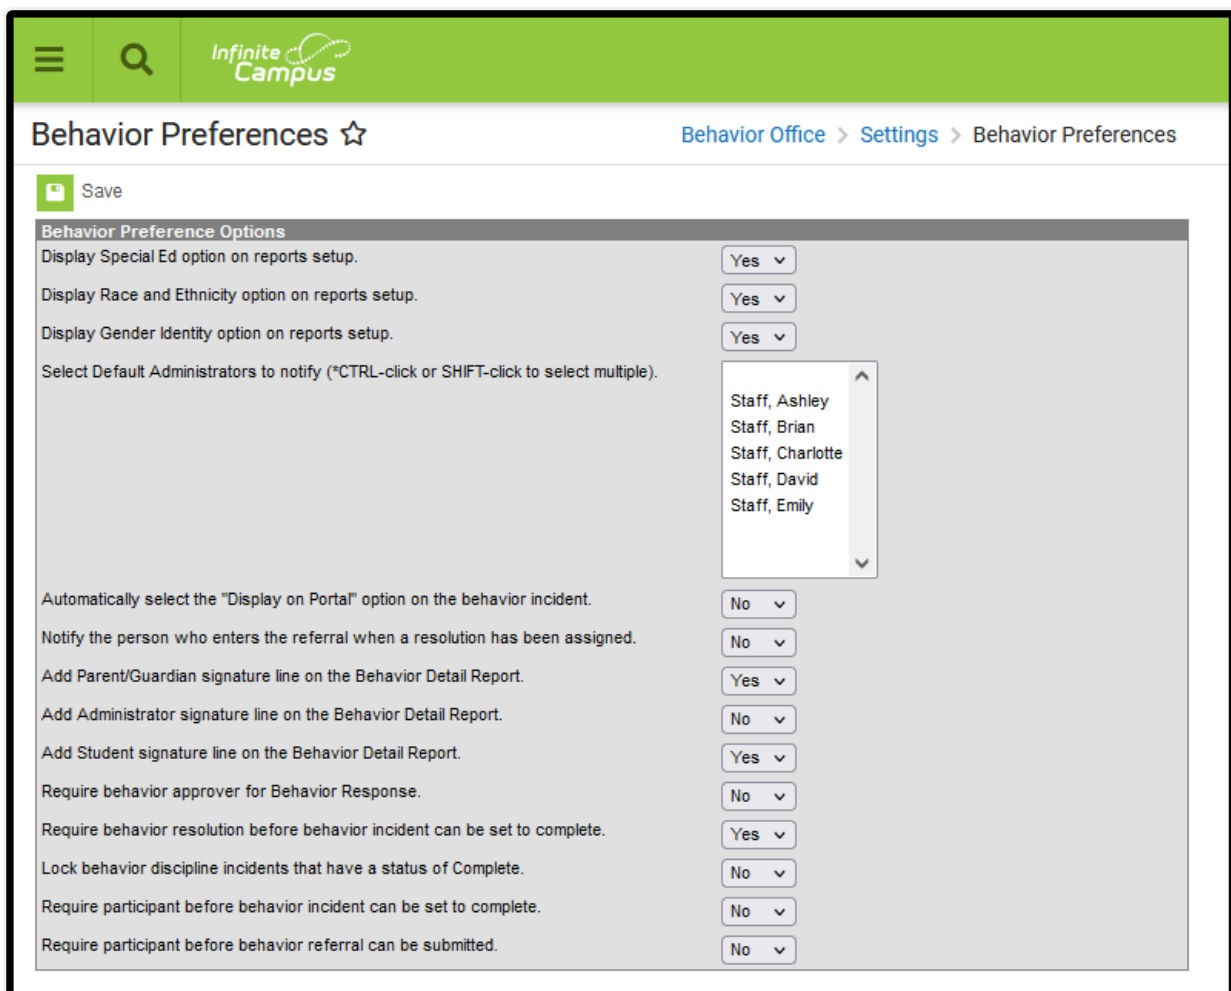

Last Modified on 07/08/2025 11:41 am CDT

Few staff need access to the Settings tools in Behavior. Access should be given as appropriate to staff responsible for managing system preferences and maintaining codes, for example, when the state or district updates behavior codes.

To learn more about these tools, see the articles in the [Behavior Office Settings](#) category.

## Behavior Preferences

The Behavior Preferences tab allows users to set preferences for what participant information is included in reports and which users are automatically notified of submitted referrals.

The screenshot shows the 'Behavior Preferences' settings page. At the top, there is a green header with the Infinite Campus logo and a navigation bar with 'Behavior Office > Settings > Behavior Preferences'. Below the header, there is a 'Save' button. The main content area is titled 'Behavior Preference Options' and contains a list of settings, each with a dropdown menu for selection. The settings are as follows:

☒ Allow attendance modification

Selecting a Sub-Type of Suspension allows users to track how many days a student was assigned a suspension resolution during the year. The student's resolution will have a required Duration in School Day field and the sum of all Duration in School Days will be reported on the student's Behavior tab.

## Suggested User Groups

Typically, users of this tool have already been assigned one or more Product Security Roles that grant administrative-level access; therefore, a user group assignment is not necessary.

If your district's needs are different, you may choose to create a group that meets those needs.

See [User Groups and Suggested Roles](#) for more information.
