

FRAM Setup Tool Rights

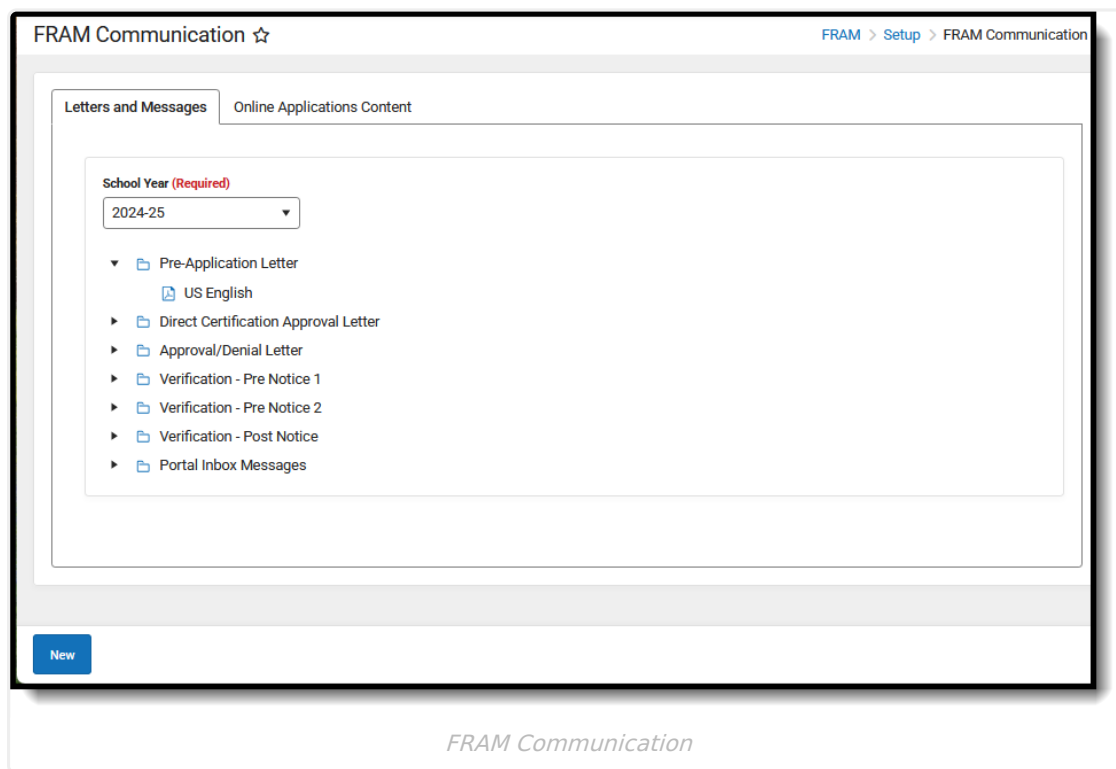

Last Modified on 07/30/2025 1:48 pm CDT

FRAM Setup tools allow districts to create and manage letters and online applications, set parameters for applications and verification, and review the income guidelines for a selected school year.

See the following article for information on using these tools:

- [FRAM Communication](#)
- [FRAM Preferences](#)
- [Income Eligibility Guidelines](#)

FRAM Communication

The screenshot shows the FRAM Communication tool interface. At the top, there is a breadcrumb trail: FRAM > Setup > FRAM Communication. Below this, there are two tabs: "Letters and Messages" (selected) and "Online Applications Content". The main content area is titled "School Year (Required)" and shows a dropdown menu with "2024-25" selected. Below the dropdown, there is a list of folders and documents:

- Pre-Application Letter
 - US English
- Direct Certification Approval Letter
- Approval/Denial Letter
- Verification - Pre Notice 1
- Verification - Pre Notice 2
- Verification - Post Notice
- Portal Inbox Messages

At the bottom left of the interface, there is a blue button labeled "New".

Note the following:

- Assigning tool rights to just FRAM Communication displays the tool, but the Letters and Message tab and the Online Application Content tab are not accessible. Subrights must be assigned in order to view the tabs.
- Read rights to Letters and Messages and Online Application Content allow access to view the letters and other content, and users can enter new text; however, without Write

rights, the changes will not be saved. An Unsaved Changes message displays at the end of the workflow when entering text without Write rights.

- Read rights to Letters and Messages controls the selection of a School Year on that tab and in the Online Application Content tab.
