# Data Export Tool Rights

Last Modified on 12/14/2025 8:45 pm CST

The **Data Export** tool allows users to view the results of Ad hoc filters in multiple report formats and files. All Ad hoc filters created via the Filter Designer are able to be exported via the Data Export tool.

Be careful when granting delete rights to this tool, as deleting an Ad hoc filter within the Data Export tool permanently deletes the filter from all areas of Campus.

To learn how use this tool, see the Data Export article.

Data Export

Available Tool Rights

Subrights in *italics*. Data Warehouse subright applies to districts who have enabled data warehouse for their site.

R	W	A	D
View Data Export tool.	Modify existing exports.	Create new exports.	Delete saved filter.
