

Data Viewer Tool Rights

Last Modified on 08/18/2025 10:52 am CDT

The Data Viewer tool is a report building tool that allows users to drag and drop fields into a real-time view of a report as it is being built.

To learn how to use this tool, see the [Data Viewer](#) article.

Data Viewer - Edit

* Name:

Field Selection:

Drag selected field to Report Preview pane to add column to selected location; field will also be added to Filtering pane *Field drop-down list.

Dragging selected field to Filtering pane will add field to the filter options only.

Double clicking a selected field will append the column to the end of the Preview pane.
