

Data Validation Tool Rights

Last Modified on 12/08/2025 2:49 pm CST

Data Validation tools are part of the [Campus Data Suite](#). These tools allow districts to check for missing or invalid Campus data.

To learn more about these tools, see the articles in the [Data Validation](#) category.

Stored Procedure Setup

Stored Procedure Setup is used to create and manage procedures used within Validation Rules and to report data within the Data Validation Report.

Stored Procedure Setup ☆

Reporting > Data Validation > Stored Procedure Setup

Stored procedures created within the 'cust' database schema must be mapped before they can be used in the Data Validation tools.

Display Name ↑	Procedure	Owner	Status
<input type="text"/>	<input type="text"/>	<input type="text"/>	Active ▾
Students with a state race that does not match the core list	dbo.DV_MN_StudentInvalidRaceEthnicity	SYSTEM	ACTIVE

New

Procedure

dbo.DV_MN_StudentInvalidRaceEthnicity

Display Name

Students with a state race that does not match the core list

Description

Students with an Race/Ethnicity value that is not in the Race Ethnicity Droplist.

Validation Groups

Data Validation Report

The Data Validation Report allows users to generate a report containing data based on Validation Groups established via the Validation Groups tool. District users can run the report against their local data set or the state's data set.

Data Validation Report ☆

Reporting > Data Validation > Data Validation Report

Instructions

The Data Validation Report returns results from the Data Validation Group selected. The Summary section includes the number of occurrences for each Data Validation Rule; if a Baseline Rule is used its Total population will be returned along with the Rate of the primary Rule compared against the Baseline Rule.

Suggested User Groups

If users who do not already have full administrative tool rights will be using these tools, create and assign groups according to your district's needs.

Full/Restricted Tool Access

Full Access

Full access to the Data Validation admin tools, which allows for local indexing of Stored Procedures and creation/maintenance of Validation Rules and Groups, is only available through the purchase of one of the Data Analytics Suites.

Full access is limited to Data Validation admin tool items created in the local database. For example, District Edition customers have full access to District-owned Validation Rules created locally but restricted access to System-owned Validation Rules delivered by Infinite Campus.

Restricted Access

By default, all District Edition customers will have full access to the Data Validation Report but restricted access to the following Data Validation admin tools:

- Stored Procedure Setup
- Validation Rules
- Validation Groups

Customers with restricted access are only able to tag Validation Rules and assign Tool Right User Groups to Validation Groups, the latter of which controls Validation Group availability for reporting in the Data Validation Report editor. Validation Rules and Validation Groups will only be available directly from Infinite Campus or State Edition via DIS publishing.
