

# Data Validation Tool Rights

Last Modified on 05/14/2026 10:53 am CDT

**Data Validation** tools are part of the [Campus Data Suite](#). These tools allow districts to check for missing or invalid Campus data.

To learn more about these tools, see the articles in the [Data Validation](#) category.

## Stored Procedure Setup

Stored Procedure Setup is used to create and manage procedures used within Validation Rules and to report data within the Data Validation Report.

The screenshot shows the 'Stored Procedure Setup' interface. At the top, there is a breadcrumb trail: Reporting > Data Validation > Stored Procedure Setup. Below this is a message: 'Stored procedures created within the 'cust' database schema must be mapped before they can be used in the Data Validation tools.'

The main area contains a table with the following columns: Display Name, Procedure, Owner, and Status. The table has one row:

Display Name ↑	Procedure	Owner	Status
Students with a state race that does not match the core list	dbo.DV_MN_StudentInvalidRaceEthnicity	SYSTEM	ACTIVE

Below the table is a 'New' button. A modal window is open, showing details for the selected procedure:

- Procedure:** dbo.DV\_MN\_StudentInvalidRaceEthnicity
- Display Name:** Students with a state race that does not match the core list
- Description:** Students with an Race/Ethnicity value that is not in the Race Ethnicity Droplist.
- Owner:** System
- Hidden:**

The modal also includes a 'Parameters' section with a table:

Parameter	Help Text
@selectedEndYear	
@selectedDistrict	
@selectedSchool	

At the bottom of the modal is a 'Close' button. The caption below the screenshot reads 'Stored Procedure Setup'.

## Validation Rules

Validation Rules are used to create and manage rules within Validation Groups and to report data in the Data Validation Report.

Validation Rules ☆ Reporting > Data Validation > Validation Rules

Name ↑	Tag	Owner	Status
<input type="text"/>	<input type="text"/>	<input type="text"/>	Active
1. Schools and Calendars Report Descriptions		SYSTEM	ACTIVE
2. Student Information Report Descriptions		SYSTEM	ACTIVE
3. Transcripts Report Descriptions			
4. Health Report Descriptions

## Validation Groups

Validation Groups allow users to build groups of rules for auditing and reporting data in the Data Validation Report.

Validation Groups ☆ Reporting > Data Validation > Validation Groups

Name ↑	User Groups	Owner	Status
<input type="text"/>	<input type="text"/>	<input type="text"/>	Active
1. Schools and Calendars		System	ACTIVE
2. Student Information		System	ACTIVE
3. Transcripts		System	ACTIVE
4. Health			
5. Federal			
6. Census			

**Name \***

# Data Validation Report

The Data Validation Report allows users to generate a report containing data based on Validation Groups established via the Validation Groups tool. District users can run the report against their local dataset or the state's dataset.

**Data Validation Report** ☆ Reporting > Data Validation > Data Validation Report

---

**Instructions**

The Data Validation Report returns results from the Data Validation Group selected. The Summary section includes the number of occurrences for each Data Validation Rule; if a Baseline Rule is used its Total population will be returned along with the Rate of the primary Rule compared against the Baseline Rule.

**NOTE:** The user MUST be a member of a selected User Group and have tool rights to the Data Validation Report for this Data Validation Group to be available for reporting.

## Suggested User Groups

If users without full administrative tool rights are using these tools, create and assign groups according to your district's needs.

## Full/Restricted Tool Access

### Full Access

Full access to the Data Validation admin tools, which allows for local indexing of Stored Procedures and creation/maintenance of Validation Rules and Groups, is only available through the purchase of one of the Data Analytics Suites.

Full access is limited to Data Validation admin tool items created in the local database. For example, District Edition customers have full access to District-owned Validation Rules created locally but restricted access to System-owned Validation Rules delivered by Infinite Campus.

### Restricted Access

By default, all District Edition customers will have full access to the Data Validation Report but restricted access to the following Data Validation admin tools:

- Stored Procedure Setup
- Validation Rules
- Validation Groups

Customers with restricted access can only tag Validation Rules and assign Tool Right User Groups to Validation Groups, the latter of which controls Validation Group availability for reporting in the Data Validation Report editor. Validation Rules and Validation Groups are only available directly from Infinite Campus or State Edition via DIS publishing.
