Tool Search: State Reporting

The Special Education State Reporting tool allows users to store and manage student Special Education state reporting data. This tool removes the legal burden of having a Special Education team meeting to amend the setting for age-based changes, such as an early childhood student aging out. Users can use one tool to manage students' data without modifying their special ed documents.

> See the core Special Ed State Reporting article for information on necessary tool rights, SPED Flags functionality, and guidance on adding SPED State Reporting or Setting records.

Special Ed State Reporting

Early Childhood Program Evaluation

The Early Childhood Program Evaluation section allows users to enter reported Special Ed data that is not stored on a student's document. Overlapping records are NOT allowed.

Select an existing record or click **New** to open the Early Childhood Program Evaluation detail screen.

Early Childhood Program Evaluation

The following table lists all the fields in the Early Childhood Program Evaluation section.

Field	Description	Additional Information
