Tool Search: Migrant Eligibility

The **Migrant Eligibility** tool captures information for students whose parents/guardians move frequently in an effort to find work or better living conditions. The Federal Migrant Education Program - Title I Part C provides support for these students to be successful in their education. The [Federal/State Program Updater Tool](#) can be used with this program.

This article explains how to enter Migrant Eligibility information for an individual student.

See the [Migrant Enrollment](#) article to learn how to enter migrant enrollment information for an individual student. See the [Program Services: Migrant Services](#) article to learn how to enter migrant services information for an individual student.

The screenshot shows the 'Migrant Eligibility' tool interface. At the top, there is a breadcrumb trail: 'Student Information > Program Participation > Migrant Eligibility'. Below this, the student's name 'Student, Sample D' and details 'Student #: 1234 Grade: 2 DOB: 06/20/2018' are displayed. A 'Related Tools' dropdown menu is visible on the right. The main form area contains two date input fields: 'Qualifying Arrival Date' and 'Eligibility Expiration Date', both with a calendar icon and an 'Apply' button. Below the form, a summary box shows 'Qualifying Arrival Date: 07/01/2025', 'MSIX ID: 12', and 'Created By: Sample Charter School ; 01/13/2026', with a 'View' button. At the bottom, there are 'New', 'Documents', and 'Print' buttons.

Publish Migrant Records from a State Edition to a District Edition

State Edition users can publish Migrant records for an **individual** student from a State Edition to a District Edition. The [Federal Programs Publishing](#) tool is used to publish changes for **all students** for whom a change has been made.

The owner of the published data can edit it, the recipient of the pushed data cannot. Districts cannot edit data pushed to them from the State, and the State cannot edit data published by the District.

Deleted records automatically update at the District level and do not need to be published.

State Edition - Publish State Records

1. **Create** or **change** an individual student's record in **State Edition**.
2. If you wish to send those changes to **District Edition**, click the **Publish State**

Records icon.

3. A message displays indicating the request has been submitted. Click **OK**.
4. A Migrant record is created in the District Edition.

State Edition to DIS-linked District Editions

When data is published from the State Edition to DIS-linked District Editions, logic compares data from the State Edition versus the District Edition. Note the following:

- Users must have statewide access to publish student records.
- There must be at least one state-owned record for the student in order for the Publish State Migrant Records icon to display.
- Only state-owned records can be published.
- For State-linked customers, the Owner column on both the State and District editions displays the district name if the record is a district owned record and 'State' if it is a state owned record. The Filter dropdown allows users to view all records, only state owned records, or only district owned records.
- Deleted records automatically update at the District level and do not need to be published.

District Editions to State Edition

When data is published from the State Edition to DIS-linked District Editions, logic compares data from the State Edition versus the District Edition:

- Only State owned data is published down to districts.
- When the Migrant record being published does not exist at the district, the Migrant record is created at the district.
- When the Migrant record being published exists at the district, data changes made at the State level are updated on the district record.
- When the Migrant record being published exists at the district but no changes exist between the state and district record(s), no update is made.
- When the Migrant record being published exists at the district but the record was deleted in the State Edition, the record is deleted at the district.

Custom Fields

Users can use the [Custom Attribute/Dictionary](#) to add District and State Defined fields for Migrant in State and District editions. Custom fields do not sync to the state edition from the district edition. Custom fields are available in Ad hoc reporting.
