Technical Information

See the Technical Information - Release Pack Campus.2547 (https://kb.infinitecampus.com/help/technical-information-release-pack-campus2547) article for a list of schema changes in this release.

Academic Planning

Student Status Mode Update Issue (SIS-191304)

An issue where the Update Student Status Mode in the Course Plan Administration tool was not updating student statuses as expected has been resolved.

Path: Student Information > Program Administration > Course Plan Administration

Activity Registration

Missing Registered and Paid Student (SIS-176677)

Resolved an issue where students who registered and paid for an activity were not appearing on the Activity Roster (https://kb.infinitecampus.com/help/activity-monitor).

Path: Student Information > Activity Registration > Activity Monitor

Adding a School When Copying Registration (SIS-187073)

Resolved an issue when attempting to copy an open or closed registration (https://kb.infinitecampus.com/help/activity-monitor) and remove the original school while adding another.

Path: Student Information > Activity Registration > Activity Monitor

Ad hoc Reporting

Search Limits Added to Filter Designer (SIS-166657) **[Enhancement]**

Previously, teachers without Unfiltered Search access could view results for all students within the selected calendar when using the Filter Designer (https://kb.infinitecampus.com/help/query-wizard) tool. The search logic has been refined to deliver more targeted and relevant data. Results are now limited to students assigned to a teacher's course sections within the selected calendar.

Path: Reporting > Ad Hoc Reporting > Filter Designer

Search Limits Added to Data Viewer (SIS-192835) **[Enhancement]**

Previously, teachers without Unfiltered Search access could view results for all students within the selected calendar when using the Data Viewer (https://kb.infinitecampus.com/help/data-viewer) tool. The search logic has been refined to deliver more targeted and relevant data. Results are now limited to students assigned to a teacher's course sections within the selected calendar.

Path: Reporting > Ad Hoc Reporting > Data Viewer

Assessments

Assessment Name Character Limit Increased (SIS-190940)

The character limit for assessment names (https://kb.infinitecampus.com/help/assessment-center-test-detail) was increased to 255. When copying an assessment with a name that is near the 255-character limit, the copied assessment is saved as "Copy of " + the assessment name. The end of the name is truncated not to exceed the new character limit.

Path: Student Information > Assessment Administration > Assessment Center

Map Data User Interface Updates (SIS-192252) **[Enhancement]**

Changes were implemented for the Step 3- Map Data (https://kb.infinitecampus.com/help/assessment-score-data-import) user interface to better adhere to Section 508 accessibility requirements:

- Replaced 'Show All Hidden' with 'Restore Deleted Columns'.
- Changed the 'X' button to 'Delete'.
- Removed the minimize '+/-' column header and the ‘Expand All’ button.

Path: Student Information > Assessment Administration > Assessment Center > Map Data

Dates Not Importing (SIS-193382)

The issue that previously prevented date fields from importing during test uploads in the Assessment Center (https://kb.infinitecampus.com/help/assessment-score-data-import) has been resolved. All properly mapped dates now import successfully without errors.

Path: Student Information > Assessment Administration > Assessment Center

Attendance

Classroom Monitor Tool Updates for Multi-Period Sections (SIS-193992)

An issue where the Classroom Monitor Tool (https://kb.infinitecampus.com/help/classroom-monitor-article) was not updating to green for sections spanning multiple periods after a recent update has been corrected.

Path: Attendance Office > Attendance Management > Classroom Monitor

Campus Instruction

Go To Student Information Link Didn't Work in Testing Sites (SIS-194076)

Previously, the "Go To Student Information" link in Campus Instruction > Students > Attendance (https://kb.infinitecampus.com/help/taking-attendance-with-the-roster) released in Campus.2543 didn't work in staging and sandbox sites and other test environments. This issue didn't occur in production sites and has been corrected.

Path: several tools in Instruction, such as Instruction > Students > Advisory > click student name

Teacher Attendance Seating Chart Display Issue (SIS-194162)

The attendance seating chart (https://kb.infinitecampus.com/help/taking-attendance-with-a-seating-chart) now displays correctly in full screen when taking attendance. This resolves an issue where the seating chart did not fill the entire screen after recent updates to the Attendance list released in

Campus.2543.

Campus Learning

New! Groups - A Staff, Parent, and Student Communication Tool (SIS-189814) **[Enhancement]**

A new Groups tool has been added to Campus Learning. This tool allows users to create groups that include students, parents, and staff members and communicate with them via Campus. These groups can be created around events, topics, organizations, and interests. Depending on group settings, members can create posts and reply to others in the group.

Group Owners can

- Create groups and determine the posting permissions for that group.
- Make the group public, so that any users in the district can request to join the group, or set the group to private so that only users who are invited can join.
- Participate in the group, including creating posts and replies and flagging inappropriate content.
- Moderate groups and resolve flagged posts.
- Manage group membership.
- View communication history for the group, which maintains original content if editing content is enabled.
- Archive groups that are no longer needed.

Only staff members can be given the role of Group Owners.

Group Members can

- Post and reply in the group, depending on group settings.
- Flag inappropriate content.
- Search for groups to join.

Staff, parents, and students can be members of groups.

Note: when a student wants to join a group, their guardians must first provide approval.

The Groups Administration tool allows administrators to oversee the use of groups, including resolving flags and other Group Owner tasks. Access to this tool is governed by the Groups Administrator tool right. Group Administrators can see any Groups tied to "All Schools" and to any Schools to which that user has calendar rights. This level of access should be given sparingly. At this time, groups should not be created that need to be private at the district level. For example, Campus would not recommend creating a private group of all principals at the district. That group would be visible to any users at the district with the Group Administration tool right.

Access to the Groups tool is granted to staff members via tool rights. Additionally, a System Preference must be enabled to turn on Groups for a district. An additional setting is available to automatically add a student's guardians to any groups the student is a member of. The Campus Digital Repository must also be enabled for groups to share images and attachments.

Standards Portfolio - Read-Only Assignments (SIS-192055)

Viewing assignments in the Standards Portfolio (https://kb.infinitecampus.com/help/standards-portfolio-progress-monitor) has been updated to make the screen read-only. Previously, options to reassign, edit, and save assignments displayed in error in this view.

Path: Instruction > Grades > Progress Monitor > Portfolio

Quizzes - Placeholder Text (SIS-192720) **[Enhancement]**

Previously, when creating a Matching, Ordering, or Number Line question (https://kb.infinitecampus.com/help/quiz-question-types), the placeholder text didn't clear when the user clicked a response cell to add text. This has been corrected.

Path: Instruction > Curriculum > Curriculum List > open a quiz

Add Math Equations to Rich Text Fields (SIS-193341) **[Enhancement]**

This enhancement allows users to insert mathematical equations into rich text fields in curriculum. Click the equation button to build a math equation using common mathematical operators, characters, and formulas. The feature makes it easier for teachers in math and science courses to include complex equations in quizzes and other assignments, beyond what can be typed using a standard keyboard.

Path: Instruction > Curriculum > Curriculum List > New

Curriculum Copier Access Improved for Teachers (SIS-193522)

Teachers can now use the Curriculum Copier (https://kb.infinitecampus.com/help/curriculum-copier) without requiring calendar rights to previous school years.

Path: Instruction > Grades > Grade Book

Add to Section in Other Planners (SIS-194096)

Previously, an error occurred when a user clicked Add to Section in the Other Planners (https://kb.infinitecampus.com/help/other-planners) view of the Planner, and the section selector didn't load in the copier tool. This has been corrected.

Path: Instruction > Overview > Planner > Other Planners

Incorrect Option Removed from Copier and Library (SIS-194248) **[Enhancement]**

Previously, when viewing an assignment in the Curriculum Copier (https://kb.infinitecampus.com/help/curriculum-copier) or Library, the Reassign to All Students button displayed in Preview view when it shouldn't. This has been corrected.

Path: Instruction > Grades > Grade Book > Settings > Curriculum Copier

Census

Student Summary Tool (SIS-194260)

A bug affecting the ability to access the Student Summary tool (https://kb.infinitecampus.com/help/student-summary1), which also impacts the RTI Caseload (https://kb.infinitecampus.com/help/caseload-response-to-intervention) functionality when attempting to access student summaries, has been resolved.

Centralized Cloud Services

New CDR URLs for Production and Non-Production Environments (SIS-193673) **[Enhancement]**

With this release, CDR URLs have been changed, and therefore, firewall rules must be updated to ensure CDR-related functionality remains available.

All in-district and self-hosted customers must:

- Open network traffic to 'stage.cdr.infinitecampus.cloud' for any non-prod environments, including training, sandbox, and any other non-production environments the district regularly utilizes.
- Open network traffic to 'cdr.infinitecampus.cloud' for the district's production environment.

It is crucial you update these settings before taking the Campus.2547 release (or any future release) to ensure a seamless transition to the latest version of Campus.

California - Automated Process for Gathering Attendance Data in Expanded Learning Opportunity Program (SIS-189943)

An automated overnight process has been implemented to update Expanded Learning Opportunity Program (ELOP) (https://kb.infinitecampus.com/help/work-based-learning-california) records based on attendance data from designated courses and sections. The stored procedure sums all days (whole values only) a student attends ELO courses for all instructional days (school days) in a calendar year (up to the date the procedure runs). A student is counted when they are marked present in the course.

A student can only earn one day of credit per calendar day. If a student attends a before-school course and an after-school course on the same day, one 1 day is earned.

- When the student has an active ELO record (or, when there are multiple ELO records active on the current date, the most recent record), the stored procedure **UPDATES** the ELOP Days

value.
- When the student DOES NOT have an active ELO record, the stored procedure **CREATES** a new record with the current start date, a Program Type of 194: ELP - Expanded Learning programs, and ELOP Days with the calculated value.
- When the student has more than one active record with a Program Type of 194, the stored procedure **DOES NOT CREATE** a record for them.

Kentucky

Kentucky – State to District Login Now Available (SIS-190439)

A new State to District Login tool is now available in the Kentucky State Edition of Campus. This tool allows users (assigned to specific user groups) to seamlessly log into a district's Campus site (as themselves) using a preconfigured SSO connection.

Note: Only State Edition users assigned to the KDEAdmin, KDEAudit, and/or KDEHealth user groups can successfully log in to a district using this tool. Assigning tool rights to a user alone will not suffice.

At the district level, districts will see a State Single Sign-On (SSO) configuration enabled in their SAML – SSO Service Provider Configuration tool. This configuration allows the state to log into your district site. You can disable it, however doing so removes the ability for the state to log into your site.

Each district controls what tools are assigned to the KDEAdmin, KDEAudit, and KDEHealth user groups. This means they are able to control what tools state edition users logging in can or cannot access.
