Path: No specific path

OneRoster 1.1 - Incomplete School Information (SIS-194212)

Path: No Specific Path

Previously, if a request was made to the Users endpoint for a specific individual who is inactive in Campus, the record returned with the correct status of 'tobedeleted'. Arizona Ed-Fi: Update Special Education Program Exit Logic for W31 End Status (SIS-193313)

The logic for calculating the reasonExitedDescriptor in the Student Special Education Program Associations Resource (https://kb.infinitecampus.com/help/arizona-ed-fi) has been updated. When an Enrollment uses the End Status 'W31: Long-Term Suspension', the system will now correctly report SPED07 instead of SPED01 in the Student Special Education Program Associations Resource.

A resync of the Student Special Education Program Associations resource is required with this update.

Arizona - Private Addresses in Student Education Organization Associations Resource (SIS-193876)

The Student Education Organization Associations Resource (https://kb.infinitecampus.com/help/arizona-ed-fi) has been updated to include addresses marked as private. Previously, addresses associated with Household Memberships or Household Locations marked as "Private" were excluded from this resource.

A resync of the Student Education Organization Associations resource is required for this update.

Path: Ed-Fi

Arizona - Student Education Organization Association Resource - District Entity ID (SIS-194095)

The Student Education Organization Association (SEOA) Resource (https://kb.infinitecampus.com/help/arizona-ed-fi) now correctly identifies and sends the proper District Entity ID when using a multi-configuration connection. Previously, the system was using a single District Entity ID for all connections, which caused sync errors and 403 errors for some students.

Certain students may still receive a 409: Identifying Values Are Not Unique or 404: Not Found error in the Ed-Fi Error Log. This will be addressed in a future update. These errors can be ignored and archived. They do NOT prevent the accurate records from reporting.
