Advanced Attendance and Appointments Release Notes (2026)

Last Modified on 11/06/2026 2:23 pm CST

The Advanced Attendance and Appointments toolset is a custom tool available only to districts that purchase it. The Advanced Attendance and Appointments toolset is part of the Campus Workflow Suite.

Release notes provide applicable personnel the ability to review enhancements, modifications, and corrections included in a release pack prior to accepting an update. It is recommended that users review the release notes carefully and notify the appropriate district staff of any changes to the product.

The Advanced Attendance and Appointments Release Notes describe the changes included in the release pack that may impact users who use the Advanced Attendance and Appointments tools as add-on functionality to their existing student information system.

Questions or concerns regarding an update should be directed to Campus Support.

See the Advanced Attendance and Appointments Product Documentation for more information.

The following Release Notes are available:

Advanced Attendance and Appointments Version 3.0.9 (11/6/2026)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus-2647 and later.

Fixes

- Fixed an issue where Custom Scanners could be created with white space before or after their name. This also added a check for duplicate custom scanner names as well. (CDP-5044)
  - Tool Search: Custom Scanners
- Fixed an issue where deleted Behavior Resolutions would show up as options for Behavior-Resolution Matrix. However, if a matrix already uses the deleted resolution (i.e. the matrix has given that resolution to a student), districts will need to deactivate that matrix and create a new one. (CDP-5360)
  - Tool Search: Behavior Resolution Matrix.
- Fixed an issue where under certain circumstances, a student would not be signed out of a Location Capacity location and would instead be duplicated. (CDP-5388)
  - Tool Search: Location Capacity View
- Fixed an issue where students who had multiple, non-overlapping enrollments in the same

year in the same school and had different grade levels for those enrollments were having duplicate entries in Hall Pass History Report. However, students with multiple, overlapping enrollments with different grade levels in the same year and school will continue to have some duplicate entries in the Hall Pass History Report for passes. (CDP-5399)
    - Tool Search: Hall Pass History Report
- Fixed an issue where a non-rostered student scanning into a Classroom Attendance Kiosk that wasn't taking attendance would hear the error beep even if their scan was valid. (CDP-5423)
    - Tool Search: Classroom Attendance Kiosk
- Fixed an issue where using the Check Out w/ Custom Pass button in Location Capacity View was checking out a different student checked into that location. (CDP-5444)
    - Tool Search: Location Capacity View
- Fixed an issue where Absence Requests was still looking at the Core Attribute/Dictionary for printed hall passes in rare scenarios. (CDP-5467)
    - Tool Search: Absence Requests

Advanced Attendance and Appointments Version 3.0.7 (10/2/2026)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus-2623 and later.

Fixes

- Fixed an issue where a Resource Not Found error would pop up when loading the Workflow Roll Forward tool for a calendar with no Scanner Settings setup. (CDP-3655)
    - Tool Search: Attendance Office > Settings > Workflow Roll Forward
- Fixed an issue where the Student Picture in the Hall Pass tool in Student Portal wasn't respecting the Display Student Picture setting in Portal Display Options. (CDP-4309)
    - Tool Search: Student Portal > More > Hall Pass
- Fixed an issue in Teacher Hall Pass View where the Create Hall Pass button and Period Schedule buttons would sometimes disappear when swapping between calendars. (CDP-4461)
    - Tool Search: Attendance Office > Scanning > Teacher Hall Pass View
- Fixed an issue where the count of absences and tardies was not showing up correctly in the Attendance Summary on Absence Requests. (CDP-4534)
    - Tool Search: Attendance Office > Attendance Management > Absence Request Processing
- Fixed an issue where swapping between calendars while in the Teacher Hall Pass View did not cause it to refresh correctly. (CDP-4557)
    - Tool Search: Attendance Office > Scanning > Teacher Hall Pass View
- Fixed an issue where attendance written by the Classroom Attendance Kiosk wasn't being tracked in the Attendance Change Tracking Report. Now, attendance written by the Classroom Attendance Kiosk will show and the modifiedBy column will show the Scanning Kiosk User. (CDP-4819)

- Tool Search: Attendance Office > Scanning > Classroom Attendance Kiosk

Advanced Attendance and Appointments Version 3.0.6 (9/11/2026)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2623 and later.

Fixes

- Fixed an issue where the Room drop-down list for Custom Scanners and the Classroom Attendance Kiosk was not in alphanumeric order. (CDP-4535)
  - Path: Attendance Office > Scanning > Classroom Attendance Kiosk; Attendance Office > Scanning > Custom Scanner
- Removed error/success Toasts and replaced some of them with Alerts in Absence Requests and Hall Pass tools on the Parent and Student Portals. These alerts are now translatable in System Settings > Portal Preferences > Translation Setup. (CDP-4800)
  - Path: Parent Portal/Student Portal > More > Absence Request; Parent Portal/Student Portal > More > Hall Pass

Advanced Attendance and Appointments Version 3.0.5 (8/28/2026)

This version of the Advanced Attendance and Appointments toolset is compatible with 2623.0 and later.

Fixes

- Fixed an issue where not having both check-in and check-out excuses set up in Scanner Settings caused the Check In/Out Kiosk to sometimes navigate to a blank screen when using the "Check In/Out" mode. Now, if you don't have at least one Check In excuse and one Check Out excuse set up, it prevents you from launching the Check In/Out Kiosk in "Check In/Out" mode. (CDP-4238)
- Fixed an issue where students' hall passes showed up with multiple rows in Location Capacity View if they had multiple enrollments in multiple schools and differing grade levels. (CDP-5002)
- Fixed an issue where Group Hall Passes were not showing on the Student Portal for students with multiple enrollments across different schools. (CDP-5050)

- Fixed a typo in the Badge Printing banner. (CDP-5175)
- Fixed an issue where selecting Returning to Class in the Check Out w/ Custom Pass droplist in Location Capacity Detail View didn't assign a Returning to Class Pass. (CDP-5198)
- KY Only - Fixed an issue where processing an absence request when a student had no schedule would cause an internal server error. It will now fail gracefully. (CDP-5203)
- Fixed an issue where uploading a file that was smaller than 2MB but larger than the max file size in the Digital Repository Preferences was causing an internal server error. Now the document upload max file size correctly looks at the Digital Repository Preferences. (CDP-5204)
- Fixed an issue where the tool tip for Appointment Hall Passes in Hall Pass Settings was going off the top of the screen. (CDP-5273)

Advanced Attendance and Appointments Version 3.0.4 (8/14/2026)

This version of the Advanced Attendance and Appointments toolset is compatible with 2623.0 and later.

Fixes

- Fixed an issue where appointments were not creating return to class hall passes when a hall pass configuration wasn't present (which was expected behavior, but unintuitive). Now, when a user creates an appointment, if no hall pass configuration is present, they cannot select any hall pass options. (CDP-5190)
- Fixed an issue where editing the date on an appointment in a series was not removing the old appointment, resulting in 2 appointments instead of 1. (CDP-5192)

Advanced Attendance and Appointments Version 3.0.3 (7/1/2026)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2623 and later.

Fixes

- Fixed an issue where checking in during the last period of the day didn't autofill attendance back in time in certain circumstances. (CDP-4876)
- Changed the behavior of processing absence requests that were already processed and had

been re-submitted with a document upload. This was due to present minutes being overwritten incorrectly with the second processing of the request. Now, processing Absence Requests that were initially processed and were re-submitted with a document uploaded will only allow users to change the attendance codes for the request. Present minutes changes/time changes will no longer be allowed when re-processing the request. (CDP-4921)

Advanced Attendance and Appointments Version 3.0.2 (6/11/2026)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2623 and later.

Fixes

- Fixed an issue where students and teachers were unable to assign hall passes via the Student Portal or Teacher Hall Pass View if the section the student was rostered into had no room number. (CDP-4940)

Advanced Attendance and Appointments Version 3.0.1 (6/8/2026)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2623 and later.

Fixes

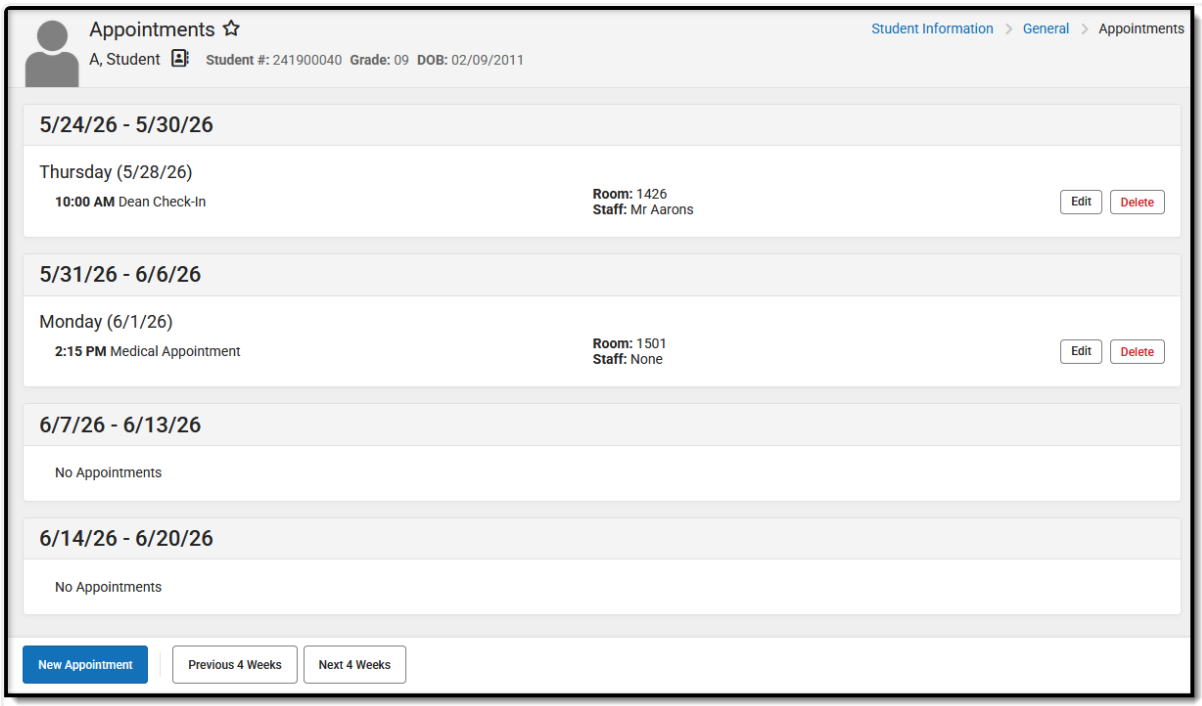

- Adjusted the new CDR check to eliminate the possibility of a timeout. (CDP-5108)

Advanced Attendance and Appointments Version 3.0.0 (6/5/2026)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2623 and later.

Enhancements

Campus Workflow now fully embraces its namesake (Advanced Attendance and Appointments) with the release of the Appointments Module. This feature allows districts to create student appointments, including real-time hall passes and notifications delivered to students to remind them of upcoming appointments.

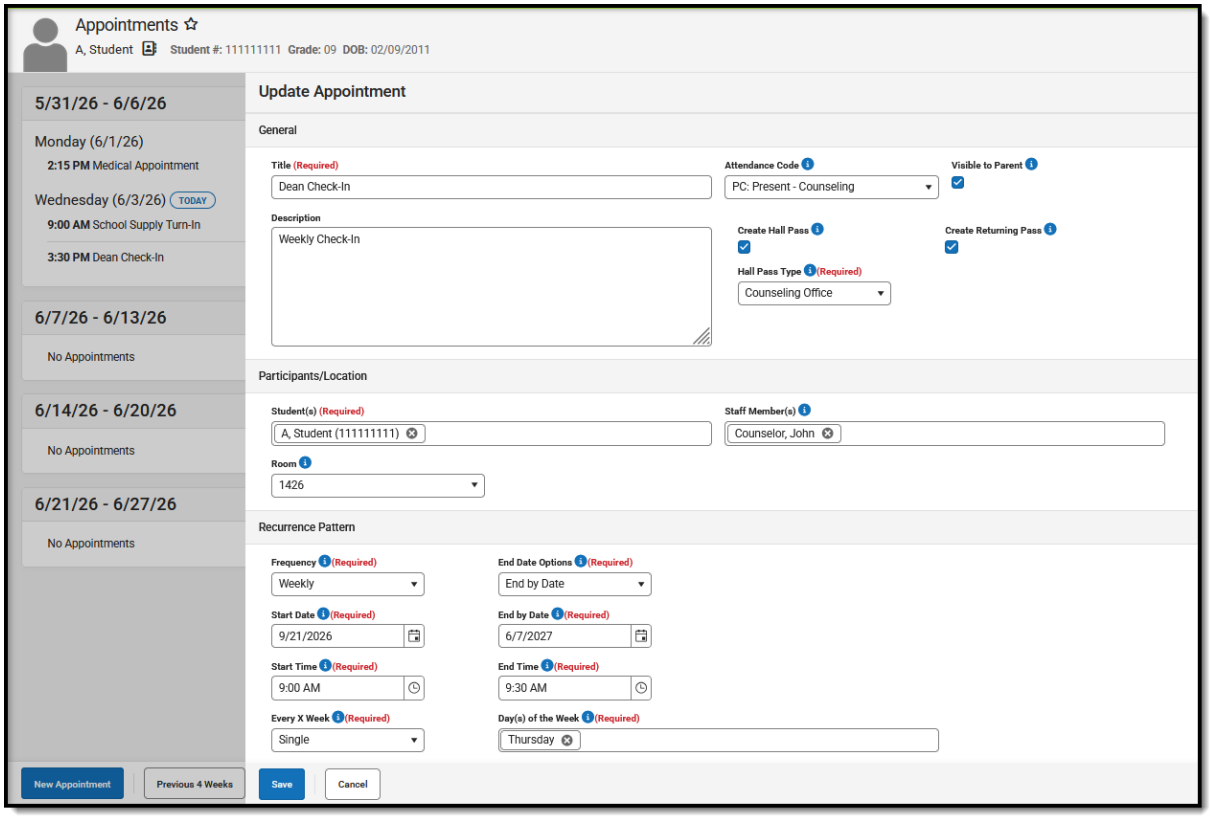

- *The Appointments Tool*

Users can schedule student Appointments for a room, staff member(s), or both for a single appointment or a recurring series of appointments that a student may need. Multiple students can be scheduled to the same appointment.

Appointment settings give staff the ability to:

- create a hall pass for the student(s) 10 minutes prior to their appointment
- send an appointment reminder through email and bell notifications to the student(s), and
- assign attendance codes for the appointment.

- Staff members can track student participation in the appointment by marking a student as having attended or not attended, which can be viewed via the Appointment Attendance Report. If the appointment ends early, students may end it in the Student Portal, or staff may end it in the Appointments tool or the Staff Appointment Calendar. This generates the Return to Class pass before the scheduled appointment end time, allowing the student to return to class. Students can view their appointments on Campus Student; parents can only view the appointment if the specific appointment is set to be visible to parents.

  Appointments can be used to schedule student appointments or simply generate a hall pass for a student in the future (such as excusing a sports team for a game).

  A user group named Workflow Administrator is automatically created and available in your site. This user group MUST be assigned to users to edit the email notification templates students receive for their appointments. Notification templates can be edited in the Letter Designer.

  To learn more about the Appointments Module, please visit Appointments.

  - (CDP-2691)

Advanced Attendance and Appointments Version 2.5.64 (5/26/2026)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2623 and later.

Fixes

- Addressed an issue where the Classroom Attendance Kiosk wasn't correctly taking attendance for skinnied courses where both courses take attendance. However, skinnied courses where both courses take attendance and both courses span more than 1 period will not be fully supported (it wasn't prior and won't be moving forward). If there is an instance where skinnied courses span more than 1 period, attendance may not appear correct in certain tools (such as the Classroom Monitor). (CDP-4661)
    - Tool Search: Classroom Attendance Kiosk

Advanced Attendance and Appointments Version 2.5.63 (5/1/2026)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2551 and later.

Fixes

- Fixed an issue where the Hall Pass History Report in the Parent Portal was failing to load properly. (CDP-5029)
    - Tool Search: Hall Pass History Report for Parents
- Adjusted a Hall Pass query to help alleviate some performance issues. (CDP-5055)
    - Tool Search: Hall Pass

Advanced Attendance and Appointments Version 2.5.62 (4/17/2026)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2551 and later.

Fixes

- Fixed an issue where the Classroom Attendance Kiosk was not properly setting the Classroom Monitor and Teacher Attendance to display that attendance was taken. Attendance was still being taken, but it wasn't showing as if it was. (CDP-5027)

Advanced Attendance and Appointments Version 2.5.61 (4/17/2026)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2551 and later.

Enhancements

- Districts now have the ability to adjust the earliest allowed arrival/departure time for absence requests submitted by parents. Prior to this, parents could always submit requests no earlier than 5 minutes into the past. This meant that parents could submit a request and try to pick up their student within the same 5 minutes, not giving staff enough time to process the request. There is a new setting in System Settings > Portal Preferences > Absence Requests that allows a district to set the earliest allowed arrival/departure time for Absence Requests submitted by parents. This can range from 5 minutes into the past (like before) or up to 8 hours into the future. (CDP-1747)
  - Tool Search: Absence Requests
- Districts now have the ability to limit hall passes for individual students! There are 4 new settings in Hall Pass settings (Daily Pass Limit, Weekly Pass Limit, Monthly Pass Limit, Term Pass Limit) that allow districts to restrict how many passes their students can get during those time frames. These global limits apply individually to each student in the school.
- There is also a new tool called Student Limits that allows districts to override the global limits for individual students who either need more hall passes (due to needing accommodations) or fewer hall passes (due to things like behavior issues). Districts can also disable hall passes for individual students in this tool as well. For more information, please visit the Hall Pass Settings and Student Limits Knowledge Base articles! (CDP-3064)
  - Tool Search: Hall Pass Settings; Student Limits

Fixes

- Excuse Codes in District-Wide Scanner Settings are now required to be unique. This change was made due to issues with the system getting confused when a user picked an excuse code that was in the list multiple times and sometimes it picked the wrong excuse. The system will still work for districts that have non-unique excuses, but when the time comes to add or edit the Excuse Codes in District-Wide Scanner Settings, districts will be required to change those codes so they are unique. (CDP-4400)
  - Tool Search: Scanner Settings

Advanced Attendance and Appointments Version 2.5.60 (4/3/2026)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2551 and later.

Enhancements

- With this release, the new Location Capacity View is now available for districts! This new functionality allows districts to determine the number of students who can sign in to or receive hall passes to a given location at one time. Districts can use this tool to help monitor student whereabouts outside of the classroom.
    - Districts can now setup up their custom scanners as locations and set capacities to determine how many students can be checked into or have hall passes to these scanners/locations at one time.
    - On the Location Dashboard, users can monitor the capacities for each of their locations within a school in real time and dive into any given location to see detailed information on which students are signed into or are traveling to those locations. This will allow staff to know how many students are currently in their location, how long they have been there, and give them a heads up as to which students should be expecting to arrive via a hall pass (and if they are lingering too long in the hallway).
    - For more information about Location Capacity, please check out Location Capacity View. (CDP-3876)
- Adjusted the auto-fill logic for Check In/Out Scanner and Absence Requests to properly overwrite teacher-taken attendance. Prior to this fix, the logic would not overwrite teacher attendance because the excuse was different than the period the student checked into. Now it will follow the same checking logic, but will overwrite teacher attendance if it runs into it during it's checks. So if a student checks in during 3rd period (where they had no attendance code) and had teacher attendance in 1st and 2nd period, it will now overwrite those periods with the selected or default code as expected. (CDP-4729)
    - Tool Search: Absence Request Processing; Check In/Out Scanner
- Adjusted the auto-fill logic for Check In/Out Scanner and Absence Requests to treat unscheduled periods the same as passing time. Prior to this fix, the logic would stop checking on unscheduled periods due to them having an attendance excuse that didn't match. Now it will properly skip them when doing it's checks. If a student checks in or out during an unscheduled period, it will be treated as passing time and look to the next scheduled period for the code to use for checking. (CDP-4745)
    - Tool Search: Absence Request Processing; Check In/Out Scanner
- Changed the order of the screens in the Parent Portal Absence Request tool. Prior to this, the create request screen was appearing first. Now the list of existing requests will show first and parents can click the "New" button at the bottom to create a request. This was changed due to feedback that parents were entering duplicate requests as they had forgotten they had already entered one. (CDP-741)

- Tool Search: Absence Request (Campus Parent)

Fixes

- Fixed an issue where non-rostered students couldn't sign in and get a hall pass from the Classroom Attendance Kiosk. (CDP-4931)
  - Tool Search: Classroom Attendance Kiosk
- Fixed an issue where districts were unable to delete document uploads attached to Absence Requests via the Repository Cleanup Tool. (CDP-4932)
  - Tool Search: Repository Cleanup

Advanced Attendance and Appointments Version 2.5.59 (3/12/2026)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2551 and later.

Fixes

- Fixed an issue where hall passes that were in Hall Pass Groups were causing an error in the Student Portal Hall Pass tool and caused no hall passes to load. (CDP-4919)
  - Tool Search: Student Hall Pass View

Advanced Attendance and Appointments Version 2.5.58 (3/9/2026)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2551 and later.

Fixes

- Fixed an issue where in certain setups, there were 2 save buttons for parents when they were trying to verify an absence request generated from the Check In/Out Kiosk. (CDP-4817)
  - Tool Search: Absence Request (Campus Parent)

Advanced Attendance and Appointments Version 2.5.57

(2/27/2026)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2551 and later.

NOTE: There is no Advanced Attendance and Appointments Version 2.5.56 due to an internal issue when creating the 2.5.56 package. Districts can upgrade from 2.5.55 (or earlier) to 2.5.57 without issues.

Fixes

- Fixed an issue where the grade levels droplist in Hall Pass History was sometimes out of order. (CDP-4622)
  - Tool Search: Hall Pass History Report
- Fixed an issue where students with a SPED or Secondary enrollment were not showing up on the Hall Pass History Report. (CDP-4656)
  - Tool Search: Hall Pass History Report
- Fixed an issue where the Classroom Attendance Kiosk wasn't flagging attendance as having been taken in the Classroom Monitor and Teacher Attendance tools. (CDP-4684)
  - Tool Search: Classroom Attendance Kiosk
- Fixed an issue where hall passes were no longer appearing in the Parent Portal Hall Pass History Report. (CDP-4686)
  - Tool Search: Hall Pass History Report for Parents
- Fixed an issue where the Fill Up/Down buttons in Absence Request Processing weren't functioning as intended. They will now (by default) grab the new code from the period the student is checking into/out of and allow users to use the Fill Up/Down buttons immediately upon entering the Attendance Grid without needing to change a code. The Fill Up/Down will happen from the period the student is checking into/out of. If the student is checking in during passing time, it will initially use the code selected by the user prior to opening the Attendance Grid and fill up from the passing time. If they are checking out during passing time, it will initially use the code selected by the user prior to opening the Attendance Grid and fill down from the passing time. Regardless of which scenario is taking place, users can still change a code anywhere in the grid and then use the fill up/down buttons to fill up/down from that spot, using the code they selected. (CDP-4820)
  - Tool Search: Absence Request Processing
- Fixed an issue where the start/end of day check for the Check In/Out Scanner was incorrectly preventing users from opening the scanner. (CDP-4822)
  - Tool Search: Check In/Out Scanner

Advanced Attendance and Appointments Version 2.5.55 (2/6/2026)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2543 and later.

Fixes

- Fixed an issue where the Export from the Sign Out Audit Report would sometimes duplicate rows. (CDP-4368)
  - Tool Search: Sign Out Audit Report
- Adjusted the wording on the Notify Parent/Guardian Tool Tip in Scanner Settings to clarify the settings functionality. (CDP-4446)
  - Tool Search: Scanner Settings
- Fixed an issue where the school day time check was sometimes using the wrong period schedule when a school had multiple calendars or schedule structures. This prevented some students from checking in/out during certain times of the day. (CDP-4584)
  - Tool Search: Absence Request Processing; Check In/Out Scanner
- Fixed an issue where Hall Pass Type options in the Student Portal were not swapping correctly when a student was switching between their enrollments. (CDP-4641)
  - Tool Search: Hall Pass Settings
- Fixed an issue where processing an Arrive Late or Leave Early absence request for the same day that a Full Day absence request was already processed (for the same student) resulted in no attendance being taken. (CDP-4734)
  - Tool Search: Absence Request Processing

Advanced Attendance and Appointments Version 2.5.54 (1/28/2026)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2543 and later.

Fixes

- Fixed an issue with the Classroom Attendance Kiosk not processing attendance. (CDP-4770)
  - Tool Search: Classroom Attendance Kiosk

Advanced Attendance and Appointments Version 2.5.53 (1/23/2026)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2543 and later.

Enhancements

- Removed the Hall Pass option from the Workflow Roll Forward Tool since it is no longer Calendar Scoped and doesn't need to be rolled forward. (CDP-4720)
  - Tool Search: Workflow Roll Forward
- Added a validator to the Custom Scanner Name field to let users know the maximum length of a Custom Scanner Name (27 characters). (CDP-4198)
  - Tool Search: Custom Scanners
- Added the ability for parents to upload a document to an absence request even after it has been submitted or processed. This puts the absence request back into a Submitted status so districts can review the document and make changes to the attendance as needed. (CDP-4114)
- The Document Upload checkbox in District Wide Scanner Settings has changed to a droplist (with added tooltip) to clarify its functionality. NOTE: If document upload is marked as required, the parent must upload a document at the time of submission. If documents can be uploaded after the request has been made, be sure to mark document upload for the absence request as optional. (CDP-4114)
  - Tool Search: Absence Request Settings, Absence Request (Campus Parent)

Fixes

- Fixed an issue where every schedule structure was showing up in the Attendance Grid instead of just the schedule structure the student was a part of. (CDP-4717)
  - Tool Search: Absence Request Processing
- Fixed an issue where the Sign Out Audit Report was giving an Internal Server Error when there were results to display. (CDP-4715)
  - Tool Search: Sign Out Audit Report

Advanced Attendance and Appointments Version 2.5.52 (1/9/2026)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2543 and later.

Fixes

- Added a Single Sign-On (SSO) logout step when launching a kiosk. This logs the user out of their single sign-on account prior to launching the kiosk. It is still recommended to launch kiosks with a non-single sign-on user if possible. (CDP-4096)

    - Tool Search: Custom Scanning Tools, Check In/Out Kiosk, Classroom Attendance Kiosk, Counseling Scanner, Health Office Scanner
- Fixed an issue where comments on Absence Requests where not being applied to each period correctly.(CDP-4669)
    - Tool Search: Absence Request Processing
- Fixed an issue where absence request check-ins were not filling attendance for the first period of the day. (CDP-4685)
    - Tool Search: Absence Request Processing
