Student Processing - Start here

Last Modified on 07/28/2026 4:27 pm CDT

After a parent or guardian enters an online registration application through the Portal and the application is approved in Application Processing, Student Processing is used to assign an application to a school, create enrollment records for new students, and/or flag the student as processed.

Tutorials
• Student Processing Video

How-to guides
• Search for an application • Assign a student to a school for processing • Open Campus Enrollments • Create an enrollment in a State Edition linked district • Flag student as processed

Reference
• Search Field Descriptions
