SIF Unity Configuration - Start here

Last Modified on 11/02/2026 3:20 pm CST

Tool Search: SIF Unity Configuration

The SIF Configuration tool enables districts to establish SIF Configurations. These options include setting Zone Information, Zone Options, and Object Rights. A valid configuration must be set up in order to send records.

How-to guides
• Set up a configuration to allow SIF data to send • Set the zones to control SIF message communication • Select the zone options to manage data filtering • Select the objects for the configuration • Import new SIF Unity certificates • Update existing SIF Unity Certificates

Reference
• Core SIF Unity Objects

State-specific configurations

- Iowa
- Maine
- Oklahoma
- Virginia
- Wyoming
