Office Visits - Start Here

Last Modified on 02/25/2026 10:17 am CST

The Office Visits tool allows a school to track the time and date a student entered the health office, when the student left, and the reason the student was there. From this tool, a district can establish a care pathway by documenting any complaints, medications, treatments, observations, interventions, or discharges related to a student's health office visit.
