

Zone Setup - Start here

Last Modified on 05/27/2026 12:37 pm CDT

A [zone](#) is an area specifically configured for data exchange and message communication between agents representing different applications (*e.g.*, Campus student system, SIF, POS, state/district).

How-To Guides

- [Set up a zone](#) for communication and data messaging
- [Set the scope](#) for a zone
- [Sync data](#) from multiple school years

Explanation

- [Zones as Part of Data Communication](#)
