

# State Programs Tool Rights

Last Modified on 02/25/2026 10:37 am CST

**State Programs** tool rights are found in the Group Tool Rights Editor under Student Information > State Programs.

Campus provides tools that customers can use to view, enter, track and report data related to students participating in various state programs. Fields, field titles, and available tools can vary by state. You may see tools mentioned in this article that your state does not use.

Most of these tools use standard **R/W/A/D** rights.

Follow your state's practices when entering program information for students.

Follow the article links in the tables below to learn how to use individual State Program-related tools.

## Available Tool Rights

Program	R	W	A	D
<a href="#">21st CCLC</a>	View program information.	Edit existing program information.	Add new program information.	Delete program information.
