eTranscript - Start here

Last Modified on 10/12/2026 12:54 pm CDT

The eTranscript functionality allows schools to generate electronic versions of student transcripts. These can be submitted to post-secondary institutions and third-party vendors to apply for admission to a college or university.

Getting started

- eTranscript Report Preferences
  - Allows districts to determine what data is displayed.
  - Should be established before generating an eTranscript.
- Electronic Release Setup
  - Complete setup to enable the release of an XML eTranscript to a vendor.
