

# CERS Configuration (California)

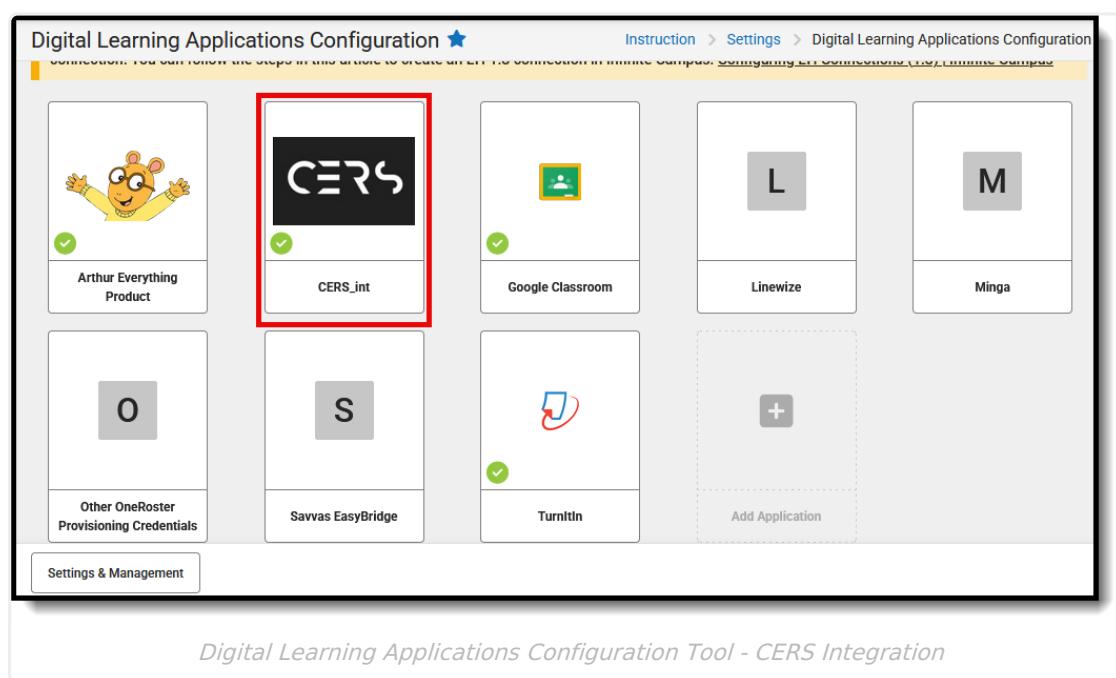

Last Modified on 02/06/2026 10:23 am CST

## Tool Search: Digital Learning Applications Configuration

School districts can integrate their SIS to the California Educator Reporting System (CERS) through the [Digital Learning Applications Configuration](#) tool. This CERS integration feature automates the creation of teacher-student group assignments in CERS and securely transfers student groups from Campus to CERS.

**Districts DO NOT need a Campus Learning License to configure and connect to CERS.**

This article provides instructions for establishing the connection and downloading Section Groups data for manual submission to CERS.

## Before you start

- Review the available content for [Digital Learning Applications Configuration](#).
- The same configuration details used for CAASPP Paperless Reporting are also needed for CERS configuration.
- Verify that the tool rights to the [Digital Learning Applications Configuration](#) have been assigned.

## Add an application

1. Select the **Add Application** from the Digital Learning Application Configuration tool. A **Browse Applications** panel displays.
2. Search for or scroll through the list of available applications for **CERS\_int**. Applications display in alphabetical order.
3. Select **CERS\_int**.

At this point, the CERS\_int has been added, but there is no connection to CERS yet. You can:

- Click **Close** to return to the main view of the Digital Learning Applications Configuration tool.  
OR
- Add a **CERS Connection**. See the next task.

## Add a CERS Connection

1. Expand the **CERS Connections** card.
2. Click **Add CERS Connection**.
3. In the pop-up, select the **OneRoster 1.2** option.
4. Click **Generate**. An Edit OneRoster Connection panel displays.
5. Enter the **Client ID**, **Client Secret**, **Base URL**, and **Token URL** values. **NOTE:** The entered values should match the values used for [CAASPP Configuration](#).
6. Select which items to include in the download in the **Include in Group Name** list of tools. The marked checkboxes indicate which fields are included in the CSV download.
7. Click **Save** when finished.

## Download a CERS Section Group

1. Expand the **CERS Connection** card and click **Edit**. An Edit CERS Connection panel displays.
2. Scroll down to the School Selection.
3. Click **Download CSV** for a particular school to view the data being submitted to CERS.
4. Save this file for manual uploading to CERS.

## What's next

Follow instructions from CERS and/or CDE for manually uploading the Section Group CSV to CERS.
