Assessment

Assessment Import Updates (SIS-193958) **[Enhancement]**

The Assessment Center score importer has been enhanced to support vertical file imports (https://kb.infinitecampus.com/help/vertical-file-score-import-assessment-center), in addition to the existing horizontal file format. Vertical files allow for one score per row with multiple rows per student, while horizontal files have one row per student containing all scores. The 'Apply to All' feature is now only visible and functional for Horizontal orientation. Additionally, unique assessment names within an assessment "family" are now required to save new or modify existing assessments. These improvements facilitate the direct import of vertical score files from national assessment vendors, eliminating the need for manual conversion.

Scheduling

Scheduling Board Updates - Load by Ad hoc, Active Year Banner (SIS-169300) **[Enhancement]**

Filters of all types can be selected (query wizard, selection editor, pass-through query). When a filter is selected, the total number of students included in the filter is displayed below the filter field. The changes being made by the load only affect the students in that filter who have course requests.
- When opening the active trial (https://kb.infinitecampus.com/help/scheduling-board-trials-new#active-year-notice) in the active year after the start of the school year, a red banner displays in the Scheduling Board to alert the user that they opened the active trial and they need to proceed with caution when making changes.
