Infinite Campus empowers school health officials to efficiently document, track, and manage all student health information. From monitoring chronic conditions to recording office visits and administering medications, Campus provides the tools needed to maintain accurate records and support student well-being.

Student Health

The student [Health](#) module allows staff to enter student health data and manage appointments.

Conditions

The [Conditions](#) tool lists all medical conditions reported for each student. Staff can add, update, or remove conditions.

- [Conditions Video](#)

Immunizations

The [Immunizations](#) tool tracks if students meet state-required vaccine guidelines. It supports compliance reporting, documentation uploads, and recording vaccine waivers.

Health Contact Log

The [Health Contact Log](#) allows nurses to document communications sent to parents/guardians about a student visit.

- [Health Contact Log Video](#)

Medications

The [Medications](#) tool stores and manages student prescription information. Nurses can schedule medication appointments and record details.

- [Medications Video](#)

Office Visits

The [Office Visits](#) tool allows schools to track scheduled and unscheduled office visits and document them: observations, treatments, interventions, etc.

- [Office Visits Article](#)
- [Office Visits Video](#)

Health Management

The [Health Management](#) module allows administrators to manage health tools and settings for staff.

Health Office Calendar

The Health Office Calendar displays all scheduled and unscheduled visits. Nurses can view in-progress and completed visits and access full details per student.

**Scheduled medication visits automatically appear on the calendar each time a dose is required.*

Reports

Health reports allow staff to generate a comprehensive dataset on student health.

Immunization Summary Report

The [Immunization Summary Report](#) generates a list of students and their compliance status with state-required vaccinations.

Health Conditions Summary Report

The [Health Condition Summary Report](#) provides a count of all active student health conditions in a selected date range, helping identify trends across a school population.

Health Office Visits Report

The [Health Office Visits Report](#) lists all student visits per date or across a date range.
