Cross-Site Enrollment

Cross-Site Enrollment - Batch Edit Attendance Data (SIS-193301)

When the home school used the Batch Edit (https://kb.infinitecampus.com/help/enter-absences-using-the-batch-edit-mode) mode on the Attendance Entry Wizard to enter attendance data for multiple days, the serving school did not receive that attendance data for any day after a day without a Cross-Site Enrollment course. This has been corrected.

Path: Attendance Office > Attendance Entry Wizard > Batch Edit

Cross-Site Enrollment - Home School Attendance Calculation (SIS-193448)

Previously, when attendance was transferred from the serving school to the home school, or vice versa, present minutes were always set to 0, regardless of the student's actual attendance. Additionally, attendance present minutes could not be edited at the home school once transferred.

Now, logic has been updated to accurately transfer present minutes based on the value recorded at the school taking attendance, regardless of the number of mapped periods involved. Home school staff can now edit the present minutes when necessary, providing greater flexibility and more accurate attendance reporting.

To help administrators understand how transferred present minutes align with period times, the following improvements were made to the Student Attendance (https://kb.infinitecampus.com/help/attendance-student) tool:

- Each period now displays its start time, end time, and duration.
- A lunch indicator has been added to any period that includes lunch time.

See the Attendance Information for Cross-Site Students (https://kb.infinitecampus.com/help/attendance-information-for-cross-site-students) for more information.

Path: Student Information > General > Attendance

Cross-Site Enrollment - Section Checkbox Restriction (SIS-196146)

This prevents issues with grade synchronization and maintains proper linkage between serving and home school sections

Scheduling

Scheduling Board - Load Alternate Course Requests (SIS-174362) **[Enhancement]**

Alternate Course Requests can now be loaded using the Scheduling Board (https://kb.infinitecampus.com/help/scheduling-board-new). In the Load Settings Panel (https://kb.infinitecampus.com/help/scheduling-board-new#load-settings-side-panel), a new **Maximum Number of Alternate Sections** option has been added. The numeric value entered here indicates the number of alternate courses a student can be scheduled into. Once this value is entered:

- Run Load Alternates (https://kb.infinitecampus.com/help/scheduling-board-new#load-alternates) to add alternate requests to all course sections.
- Right-click on a Department, Course, Section, or Term to add alternate requests by those options.

On the Walk-In Scheduler (https://kb.infinitecampus.com/help/walk-in-scheduler), alternate course requests are prioritized. On the Scheduling Board, those requests are attempted to be loaded in the order they are numbered (prioritized) on the Walk-In Scheduler, and will take into account the value in the Maximum Number of Alternate Sections.

Student Gap Scheduler - Find Students Function (SIS-179827)

When using the Student Gap Scheduler (https://kb.infinitecampus.com/help/student-gap-scheduler), selecting a student from the student search did not navigate to the Walk-In Scheduler as expected. Navigation logic has been updated to automatically redirect to the Walk-In Scheduler when a student is selected from the search results.

- When there are multiple students with a schedule gap, the search panel returns a list of students in the search results. Selecting a student from that list opens the Walk-In Scheduler tool.
- When there is only one student with a schedule gap, the Walk-In Scheduler opens immediately.

Course Management - Updates to Course Masters and Start Year, End Year (SIS-195792)

Start Year, End Year Changes

The Start Year and End Year fields on the Course Management tool have been relabeled to School Start Year and School End Year (https://kb.infinitecampus.com/help/course-management#school-start-year-school-end-year). The options in these fields list the school year as entered in the Label field on the School Year Setup tool. When a School Start Year of 25-26 is selected, the state code record is active on the date entered in the **Start Dat**e field of the School Year Detail. When a School End Year of 25-26 is selected, the state code record is active through the **End Dat**e entered in the End Date School Year Detail.

Course Masters Updates

Course Masters (https://kb.infinitecampus.com/help/course-masters) that use invalid state codes are now

considered inactive when the active school year changes from the current school year to the next school year at the district level on the School Year Setup tool. After the active year changes, Course Masters that use an invalid state code will display the inactive state code with the text (invalid) in the state code field. These codes need to be manually changed at the district to use the updated state code provided by the state.

When Course Master still has an invalid state code that is pushed to Courses, a validation error displays, indicating it cannot be pushed to courses because of the invalid state code.

When invalid state codes are linked to Course Masters in future calendars after the active year changes, the State Code field displays the invalid State Code with the text (invalid). These codes need to be manually changed at the district to use the updated state code provided by the state.
