

State to District Login

Last Modified on 03/26/2026 10:00 am CDT

Tool Search: State to District Login

The State to District Login tool allows **State Edition** users with specific user group rights to seamlessly log in to a district's Campus site (as themselves) via a preconfigured SSO connection.

This tool is currently only available in **Kentucky** and **Nevada**.

Before You Start

- Only State Edition users assigned to a pre-determined user group can access a district site using this tool. Assigning tool rights to an individual user will not suffice.
- These user groups control a person's ability to log in to a district by allowing the district to tailor the tool rights assigned to user groups, which, in turn, control what a State Edition user can or cannot access.
- At the district level, districts can disable the [State Single Sign-On \(SSO\) configuration](#), preventing State Edition users from logging in to the district.

State	User Groups
Kentucky	<ul style="list-style-type: none"> • KDEAdmin • KDEAudit • KDEHealth
Nevada	<ul style="list-style-type: none"> • NDE-SAIN • SPCSA Admin Tools

Log in to a District's Site

1. Select the district from the **District to Login** dropdown field.
2. Select the **User Group** you are using to log into the district site.
 - Only user groups in which you are a member will appear in the list.
3. Click **Login**. You will be automatically redirected and logged into the district's Campus site.

Districts control what tool rights are assigned to their user groups, so tool and information access may vary from district to district.

If you are unable to log in to a district, it may have disabled its State SSO login configuration or removed the State to District Login tool from a user group.
