Kentucky Transportation 2.0 Record Conversion (SIS-196264)

Existing Transportation records for Kentucky will be converted to Transportation 2.0 (https://kb.infinitecampus.com/help/transportation-20-kentucky) records when Transportation 2.0 is enabled. This includes:

-
- A new Transportation 2.0 record was created for every Transportation record as long as it was active on or after the active year. Records were not converted for students with Enrollment records beyond the active year.
- Records were converted for any student with an Enrollment record in the last five years.

- The conversion script retains the start and end dates from the original record in Transportation 2.0, but both Calendar and Enrollment dates are used in scenarios involving splits or gaps.
- When the calendar start date was used for the student's new Transportation 2.0 record start date, the calendar end date is also used for the Transportation 2.0 end date. Otherwise, the student's Transportation 2.0 dates should match their Enrollment Start and End Dates. When a Transportation 2.0 record was created for a future Enrollment, an End Date was not entered.
- When a student had two Enrollment records but one Transportation record in the same calendar, a new Transportation 2.0 record was created for each Enrollment with the same code.
- When a student had one Enrollment record but two Transportation records in the same calendar, two Transportation 2.0 records were created, tied to the same Enrollment with distinct codes. The Transportation Start and End Dates were used to determine the new records' dates in this instance.
- A default (NT) state reporting record was created for any student with an Enrollment but no historic transportation record to convert.
  When there is a date gap between Transportation records but no gap in the Enrollment record for the same calendar, a default (NT) record was created to fill the date gap.
