Rx Pack - Campus.2615

Last Modified on 06/17/2026 2:38 pm CDT

The following corrections are included in Rx Packs for April 2026. Rx Packs contain a small number of critical cases to fix urgent issues, with delivery in an immediate time frame (e.g., the fix cannot wait for the next four-week Release Pack).

It is recommended that customers apply all subsequent Release Packs immediately following Rx Packs. Doing so will benefit both customers and Infinite Campus when it comes to supporting the patch.

Rx Packs are cumulative; each Rx pack will automatically include all previous Rx packs within that release. These cases will also be included in the Campus.2619 pack unless otherwise noted. Rx Packs may occasionally skip a release number for Rx builds that were not made generally available.

Below is a list of all Rx Packs for Campus.2615 and the date of availability:

- Rx Pack Campus.2615.14 - Friday, May 15, 2026
- Rx Pack Campus.2615.12 - Wednesday, May 13, 2026

Classroom Integrations

LTI 1.1 Integrations Missing in Assignment Editor (SIS-199271)

After the 2619 update, the "Learning Tool" button no longer appeared in the Assignment Editor when teachers created or modified assignments. LTI 1.1 connections, such as Naiku, did not appear in the side panel for linking content, even though they were correctly configured as LTI vendors and visible under Instruction > Curriculum Planning > Learning Tools. As a result, LTI 1.1-only connections were effectively hidden and unusable for assignment linking. This has been corrected.

Assessments

Assessment Import Errors (SIS-198322)

When uploading a score file and mapping columns in Step 3, the column mappings were saved based on the original file structure. When a later version of the file was uploaded with a different structure, the existing mappings remained in the database and referenced the original column positions, leading to mismatches and import errors. This issue has been resolved. Whenever a new set of mappings is submitted, any existing mappings are cleared first. This ensures that only the current mappings are used during import and prevents conflicts caused by outdated data.

Course Planner - Alternate Requests and Sections Needed (SIS-197957)

In the Campus.2611 Release, the option to include alternate course requests was added to the
