

SIF Person Data Tool Rights

Last Modified on 05/06/2026 10:24 am CDT

The SIF Person Data tool allows you to view the XML output of a student for specific SIF objects depending on the Zone and Agent selected. This tool is useful for reviewing student SIF object data and troubleshooting specific SIF records that maybe be sending erroneous data or causing errors on the receiving end.

See the [SIF Person Data](#) articles for information on viewing XML output for a student.

The screenshot shows the 'SIF Person Data' tool interface. At the top, there's a header with a user profile icon, the title 'SIF Person Data' with a star, and a breadcrumb trail: 'Census > People > SIF Person Data'. Below the header, there's a 'DOB: 07/21/2023' field and a 'Related Tools' link. The main content area is titled 'SIF Unity Object Viewer' and 'SIF 2.* Object Viewer'. It contains an 'Instructions' section with text about displaying records and a 'Note' about the tool's scope. Below this is an 'Options' section with three dropdown menus: 'Select a School Year *' (showing '2024-2025'), 'Select a Configuration *', and 'Select a SIF Object *'. At the bottom, there's a blue 'Generate SIF Data' button. The interface is labeled 'SIF Person Data' at the bottom.

There are two options available for SIF: SIF Unity and SIF Person 2.*, depending on which SIF version your district uses. The tool rights are the same for both versions.

Available Tool Rights

R	W	A	D
• Access and view the SIF Person Data tool. • Select options from the SIF Object Viewer. • View data by clicking the Generate SIF Data button.	• N/A	• N/A	• N/A
