Resolution Type Setup - Start here

Last Modified on 11/06/2026 2:32 pm CST

The Resolution Type Setup tool allows users to create and manage resolution codes assigned to student behavior events. Behavior Resolutions describe actions taken as a result of a behavior event, such as detention or an award for good behavior. Codes can be created to reflect positive and negative behavior events.

Getting started

- Action Bar options for Resolution Types

How-to guides

- Create district-wide or school-specific Behavior Resolution Types
- Link behavior records and attendance records
- Merge Resolution Types
- View a history report of what Resolution Types have been merged

Tutorials

- Resolution Type Setup Video

Reference

- Resolution Type Setup editor fields
