Grades Analysis Report - Start here

Last Modified on 07/28/2026 3:28 pm CDT

The Grade Analysis Report groups transcript scores by credit and course, then translates them into percentiles so users can easily understand the distribution of student performance for each credit/course. This report helps visualize aggregated performance by credit, making it easier to identify credits that students struggle to complete.

This tool is available only to users in districts that have purchased the **Campus Analytics Suite**.

How-to guides

- Generate the report
- Filter and modify the report
- Format and adjust layout
- Export and share the report

Explanation

- Understand the report

Reference

- Refer to the Pivot Designer for additional information about filtering dimensions and formatting.
