Release Pack Campus.2623 - June 2026

Last Modified on 08/04/2026 11:42 am CDT

This release includes upgrades to printed reports as part of our ongoing FOP project. Rather than listing updated reports for individual cases, a list of all updated reports can be found in the PDF and DOCX Report Updates (https://kb.infinitecampus.com/help/pdf-and-docx-report-updates-2026) article.

Academic Planning

Course Plan - Extra Grade Level Column for Super Senior - (SIS-196796)

The Course Plan display has been updated to allow a column to display for grades that are above grade 12 in the Course Plan, Progress, and Course Plan Template. The column will only show up in a student's Course Plan, however, if they have an enrollment for a grade level above grade 12.

Path: Student Information > Academic Planning > Course Plan

Accessibility

Add Single Pointer UI Controls for Favorites Reordering (SIS-180729) **[Enhancement]**

Adds single-pointer controls for reordering menu favorites to improve accessibility for touchscreen and single-pointer mouse users. Previously, reordering used keyboard and multi-pointer mouse controls. This update also adds up and down buttons for each row to enable single-pointer reordering of menu favorites

Path: Favorites Menu

Assessment

Map Columns to Multiple Database Fields (SIS-192463) **[Enhancement]**

The Assessment Center (https://kb.infinitecampus.com/help/assessment-score-data-import) has been improved to enable users to map a single import column to multiple fields, offering greater flexibility for import scenarios. For example, a column containing raw scores could be mapped to both "Raw Score" and "Scale Score" at the same time.

Key highlights:

- Users can create multiple field mappings for a single column via the Options modal
- Each mapping is displayed as a separate tab within the Options modal
- The database field dropdown filters out fields already selected in other tabs for the same

column
- The main grid shows a red "!" icon if ANY tab for that column is incomplete
- Column headers show a comma-delimited list of all mapped field names

Path: Student Information > Assessment Administration > Assessment Center

Assessment Import Errors (SIS-198322)

When uploading a score file and mapping columns in Step 3 (https://kb.infinitecampus.com/help/assessment-score-data-import), the column mappings were saved based on the original file structure. When a later version of the file was uploaded with a different structure, the existing mappings remained in the database and referenced the original column positions, leading to mismatches and import errors. This issue has been resolved. Whenever a new set of mappings is submitted, any existing mappings are cleared first. This ensures that only the current mappings are used during import and prevents conflicts caused by outdated data.

Attendance

Attendance Bug Fixes (SIS-197697)

Bug fixes include:

- An issue that occurred when Classroom was enabled and prevented teachers from toggling between calendars in the Attendance tool has been resolved.
- An issue where courses scheduled across multiple sequential periods appear incorrectly on Sub Attendance Rosters has been resolved.
- Changing the sequence of periods (from Schedule & Courses > Calendar Setup > Period Setup) now preserves the attendance status (red/green) on the classroom monitor. Adding periods to a section after the school day has started and attendance has already been taken does not affect the admin’s ability to use the classroom monitor to update absences for the newly added periods or to view the correct attendance status across all periods.
- An issue with the ADM ADA Detail report in CSV format, which duplicated grade levels when two schedule structures had the same grade levels defined, has been resolved.
- An issue in which an attendance mark was defined as the "Attendance Posting Code" for virtual attendance, and the "Use code in virtual attendance posting" box became greyed out and unmarked has been resolved.
- The ADM and ADA Detail Report, generated as a CSV, now provides totals for multiple schools.
- An issue where a student who checked out during a period including lunch could not check in if the absence duration is shorter than the lunch period has been resolved.
- An issue where the teacher could not edit course participation attendance on previous days if the course did not meet today has been resolved.
- An issue that caused attendance codes to be recorded for a period in which a student was rostered in a course not marked for attendance, while also being rostered in an inactive course marked for attendance, has been resolved.

- The Guardian spelling is now correct in the Daily Attendance Processing Caller Report.
- An error with the Instruction Attendance Change Tracking PDF Report has been fixed.
- An issue where attendance taken at the home school on a section skinned with a cross-site section removed CSE attendance at the serving school has been resolved, ensuring that the serving school is always the source of truth for CSE attendance.
- When transferring attendance events between the home school and the serving school, if the calculated present minutes at the receiving school are equal to the total duration of the period, no attendance events will be created for that period at the receiving school.
- The capability to track consecutive course absences has been added to the Consecutive Absence Report.

Attendance Letters - User Group with R Rights to 'User Group Formats' Can Edit Attendance Letters (SIS-111552)

Users in a group who have 'R' (Read) rights to the 'User Group Formats' tool but 'RWA' (Read, Write, Add) rights to the 'Attendance Letters' tool can no longer edit User Group Attendance Letters. The fix to the User Group Formats tool rights behavior also applies to Attendance letters, Behavior Letter Wizard, Letter Designer, and Balance Letter Report.

Path: Attendance Office > Attendance Communication > Attendance Letters

Behavior

Behavior Response Syncs to State Edition (SIS-197175)

Behavior Response records now sync to state editions for North Carolina and Delaware.

Path: Behavior > Behavior Management > Behavior Management > Behavior Response

Calendar

Deleted Calendars Not Displaying on State Edition (SIS-195358)

An update has been made that displays a Process Inbox alert for State Edition Users when a state-linked district deletes a calendar. The deleted calendar no longer displays for that school at the State Edition level.

Path: Process Inbox

Campus Document Repository Services

Remove Contact Log From Digital Repository Preferences (SIS-172980)

A Contact Log preference was incorrectly added to Digital Repository Preferences, leading users to believe they could enable document upload functionality for the Contact Log, which has not been implemented. To avoid confusion, this preference was removed.

Path: System Settings > Digital Repository > Digital Repository Preferences

Census

Census -Remove Memory Leaks from Unclosed Census Statements (SIS-198747)

An issue where memory leaks were being caused by unclosed Census Statements on DIS queries has been resolved.

Campus Instruction

Default Term in Section Attendance Dropdown List (SIS-198152)

Previously, the incorrect term displayed in the Section dropdown list in the Attendance (https://kb.infinitecampus.com/help/taking-attendance-with-the-roster) tool for some teachers. This issue has been corrected.

Campus Learning

Linking Directly to Attachments (SIS-198071) **[Enhancement]**

When teachers attach content to a piece of curriculum, they now have the option to **Link Directly to Content**. When this option is selected and a student clicks the assignment in Campus Student, the attached content opens, bypassing the assignment details such as dates and grading. This option is helpful when sharing a resource such as a syllabus or linking directly to a class website or materials. If there are multiple pieces of content linked, students are shown a list of attachments.

Keep in mind that students cannot view any additional assignment information, including the description and grading. Assignments with Link Directly to Content selected should not have other tasks linked, such as quizzes or discussions, since students won't be able to access them.

Path: Instruction > Curriculum > Curriculum > open an assignment > Link Directly to Content

Quizzes - Randomize Question Selection (SIS-198915) **[Enhancement]**

New options have been added to the page-level question settings (https://kb.infinitecampus.com/help/create-quizzes#randomize) for quizzes. In addition to the option to Randomize Question Order, teachers now have the option to:

- Randomize Question Selection - delivers a random selection of questions from those on the page.

- Number of Questions to Deliver - the number of questions delivered from the page.
- Points Per Question - the proportion of total points possible each question is worth.

For example, if a page of a quiz has 10 questions and a teacher randomizes selection and enters a Number of 5, each student who takes the quiz will see 5 random questions from the 10 available on that page. If the teacher reassigns the quiz, students will see the same questions, but if the student reattempts the quiz, they'll get a new randomized set of questions.

Path: Instruction > Curriculum > Curriculum > create a new quiz > Page 1, 2, etc

Classroom Integrations

OneRoster Assessment - Updated to Align with Specification (SIS-198693)

The following updates have been made to the implementation of OneRoster Assessments to better align to the specification:

- Updated the getAllAssessmentResults endpoint to only return records created by the OneRoster API
- Removed the non-standard scaleScore field
- Adjusted the view to ensure all returned records have the required scoreStatus, dateLastModified, scoreDate, and status field

Path: No specific path

LTI 1.3 - Microsoft Education (SIS-198888) **[Enhancement]**

Microsoft Education (OneDrive) connections can now be configured using the 1.3 version of the LTI specification. Districts must be on a release of Campus.2623 or later to use this version of the integration.

Path: Instruction > Settings > Digital Learning Applications Configuration

LTI 1.1 Integrations Missing in Assignment Editor (SIS-199271)

After the 2619 update, the "Learning Tool" button no longer appeared in the Assignment Editor when teachers created or modified assignments. LTI 1.1 connections, such as Naiku, did not appear in the side panel for linking content, even though they were correctly configured as LTI vendors and visible under Instruction > Curriculum Planning > Learning Tools. As a result, LTI 1.1-only connections were effectively hidden and unusable for assignment linking. This has been corrected.

Path: Instruction > Curriculum > Curriculum > New

Validation Logic for Added Placements (SIS-199312) **[Enhancement]**

Validation logic has been added to ensure placements being added to a provider's LTI placements do not already exist.

Path: Instruction > Settings > Digital Learning Applications Configuration > open an LTI 1.3 connection > click the connection > Placements and Parameters

Course or Section Setup

Data Cleanup for Course and Course Master, Data Conversion to Course Catalog - (SIS-198306)

(SIS-196419) – Campus.2611: A script was created to clean up the CustomCourse and CourseMasterAttribute table. The script created for this case was intended to remove duplicate records for Course Master and Course Data. However, the script also removed ANY record for which lock=1 and value=NULL.

This was not the desired outcome, so (SIS-198240) was created to revert the (SIS-196419) script and recover the deleted records.

(SIS-198306): The purpose of this script is to clean up Course Master and Course data as well as convert Course Master locks to the Course Catalog. All data affected is only for Non-District Defined CampusAttributes.

The new script performs the following tasks:

Course Master Attribute Table:

State Defined fields

- If lock = 1, convert the record to the Course Catalog Attribute table.
- If value = NULL, delete the record from Course Master Attribute table.
- If lock =1 with a value, convert the record to the Course Catalog Attribute table. Then, keep the record and update lock = 0.
- If lock = 0 with a value, no change.
- If duplicates exist, keep the first record and delete the duplicate records.

District Defined fields

- No changes made.

Custom Course Table:

State Defined fields

- If value = NULL, delete the record from Custom Course table.
- If duplicates exist, keep the first record and delete the duplicate records.

District Defined fields

- No changes made.

Course Catalog Attribute Table

State Defined fields

- Records will be added from the Course Master Attribute table when lock = 1.

DIS/SIF

SIF – Sent Record History Duration (SIS-197634) **[Enhancement]**

A 'Days to keep SIF Sent Record History records' field has been added to the System Preferences (https://kb.infinitecampus.com/help/system-preferences1) to allow districts to set the amount of time that SIF Logs will be stored.

Path: System Settings > System Preferences

SIF Unity – Resync SIF Data and Export Object Viewer Results (SIS-198866) **[Enhancement]**

Resync functionality has been added to the SIF Person Data (https://kb.infinitecampus.com/help/sif-unity-person-object-viewer) and Configuration Object Viewer (https://kb.infinitecampus.com/help/sif-unity-object-viewer) tools to allow users to send objects outside of a trigger.
The Object Viewer in the Configuration tool has also been updated with an option to export generated results in CSV or JSON format.

Path: System Settings > SIF Unity > Configuration; Census > People > SIF Person Data

SIF Unity – Configuration Updates (SIS-199124)

Validations have been added to the Object Rights on the SIF Unity Configuration (https://kb.infinitecampus.com/help/sif-unity-configuration) tool to prevent users from saving multiple instances of the same object. Additionally, the Object Name textbox now automatically receives focus when the Add button is clicked.

Path: System Settings > SIF Unity > Configuration Tool

Ed-Fi

Ed-Fi – Tool Name Updates (SIS-160185) **[Enhancement]**

The following tools in the Ed-Fi module have had their tool names prepended with 'Ed-Fi' in the navigation menu:

- Ed-Fi Configuration
- Ed-Fi Data Comparison
- Ed-Fi Delete Tool

- Ed-Fi Error Log
- Ed-Fi Event Queue
- Ed-Fi Event Queue Statistics Report
- Ed-Fi Identity Mapping Report
- Ed-Fi Resync

Ed-Fi Data Tool Update for Staff and Parent/Contact-based Resources (SIS-195349)
[Enhancement]

The Ed-Fi Data tool (https://kb.infinitecampus.com/help/ed-fi-data-ed-fi-data) has been updated to include Staff and Parent/Contact-based resources.
The location of the Ed-Fi Data tool has been moved to the Census module.
Individual tool rights have been introduced for the Compare/Get Ed-Fi JSON button and the Resync button in the Ed-Fi Data tool.

Path: Census > People > Ed-Fi Data

Ed-Fi Configuration Tool Rights Updates (SIS-196268)

Separate tool rights have been added for the Ed-Fi Resource Preferences.
The tool rights (https://kb.infinitecampus.com/help/tool-rights-ed-fi) for the Ed-Fi Connection Detail and Resource Preferences have been updated to improve security in the Ed-Fi Configurations area. To ensure staff retain the appropriate access, districts must update User Groups/User Accounts to include the new Resource Preferences tool right. It is also recommended to review current permissions to confirm they remain appropriate.

California – CALPADS Student Discipline Behavior Updates (SIS-197930)

The following changes have been made to the CALPADS Student Discipline Behavior Extract (https://kb.infinitecampus.com/help/calpads-student-discipline) to report a record when an incident has a restraint or seclusion, even when the event does not have a state code assigned. This update affects the Student Incident, Student Incident Results, and the Student Offense files.

Additional logic applies to the Student Offense file:

- Only state-coded events are considered an offense, but the event does not need a state code.
- A record does not report a record when the Incident Status is marked as Submitted or In Progress. Only completed incidents report.

California – CCGI Extracts- Update CDSCode (SIS-197975)

The CCGI extracts (https://kb.infinitecampus.com/help/ccgi-ca-college-guidance-initiative-extracts) have been updated to allow districts to report their CDS Code. Previously, the CDS Code was derived from the District Number and School Number, but some districts (especially charter districts) do not follow this pattern. To address this, a new 14-character CDS Code override field has been added to School Information, allowing districts that do not follow the standard pattern to enter the CDS Code CCGI accepts.

The following reports have been updated to read from the new CDS Code override field:

- Course Catalog

- Course Grade Extract
- Student Extract
- High School Graduate Extract

Additionally, the Term Type field has been updated with new values.

California – ELOP Automated Process Calculation Updates (SIS-198939)

The following updates have been made to the calculation for ELOP Automated Process (https://kb.infinitecampus.com/help/work-based-learning-california):

- Students who were active during the calendar but are now ended are included.
- Courses can be instructional.
- Any days from the summer school calendar are assigned to the correct year - dates up to June 30 calculate for the current school year; July 1 and after calculate for the next school year.
- All records have a start date of July 1 and an end date of June 30.
- Two non-overlapping records in the same year are now combined into one record.
- Records that go past June 30 have been updated to count in the correct calendar:
  - A record for July 1, 2025 to July 15, 2026 is now two records: one record for dates July 15, 2025 to June 30, 2026; the second record for dates July 1, 2026 to June 30, 2027.

Also included in this work is the re-addition of the Local Record ID field to the CALPADS LEA Programs extract.

Colorado – Updates to Discipline Interchange Action File (SIS-197723)

The following updates have been made to the Discipline Interchange Action File (https://kb.infinitecampus.com/help/discipline-interchange-action-file-colorado):

- Mechanical/Physical Restraint and Seclusion incidents are now excluded from the report.
- No logic changes were made for Resolution Codes 10 and 14. Due to scenarios where CDE guidance is open to interpretation, districts will continue to have flexibility in determining how these codes are reported.
- Logic for CRDC-related behavior types has been updated:
  - Behavior Types 18–33 no longer trigger the creation of an additional record.
  - Behavior Types 41–43 trigger the creation of an additional record with:
    - The original record reports a zero-filled Discipline Action Type and Length values.
    - The additional records report Behavior Type 11 with the state-mapped resolution, and all other fields report normally.
  - Behavior Type 17 triggers the creation of an additional record with:
    - The original record reports a zero-filled Discipline Action Type and Length values.
    - The additional record reports a blank Behavior Type for district completion (values 1–16), along with the state-mapped resolution and actual action length.
  - All other Behavior Types outside of 17–33 and 41–43 report normally with no additional record creation.

Nevada – Career Readiness Hours Value Updated (SIS-198455)

The following Career Readiness (https://kb.infinitecampus.com/help/career-readiness-report-nevada) updates were applied in Nevada:

- The 'Hours' field has been modified to use the `floatField` data type with two decimal places (e.g., 999.99).
- All values in the `Hours' field have been adjusted to follow the format `x.00`.
- The `WBL_Hours` column in the Career Readiness report now accurately reflects decimal values.

These changes have been applied to both the NV State Edition and District Edition sites to maintain data integrity across platforms.

Path: Student Information > Program Participation > Career Readiness, Reporting > NV State Reporting > NV Career Readiness Report

Nevada – Total ADE Added to ADE Reports (SIS-198521)

The ADE Reports (https://kb.infinitecampus.com/help/ade-reports-nevada) tool now includes a 'TotalADE' row. The tool calculates TotalADE by summing all ADE values before rounding, then rounds the total to two decimal places. This total matches across the District Summary and School Detail extracts. A footnote in the reports describes this new element and how it differs from 'ADE'.
