

Custom Form Setup - Start here

Last Modified on 07/28/2026 3:28 pm CDT

The [Custom Forms Setup](#) tool allows administrators to upload and manage supplemental documents that can then be linked to a student's record. Custom Forms can be set up to pull information directly from Campus and/or have data entered into a form queried and reported in Ad hoc. Three types of forms can be created using this tool: blank, interactive, and interactive with a database table.

Getting started
