Validation Rules - Start here

Last Modified on 07/28/2026 4:54 pm CDT

The Validation Rules tool is used to create and manage rules within Validation Groups and to report data in the Data Validation Report.

How-to guides

- Create a new Validation Rule | Video
  - Create a Validation Rule via Ad hoc filter
  - Create a Validation Rule via Direct SQL
  - Create a Validation Rule via Stored Procedure
- Publish Validation Rules (State Edition only)
- Search for existing Validation Rules
