Early Warning - Start here

Last Modified on 09/16/2026 1:29 pm CDT

Early Warning provides school administrators, counselors, principals, etc., with a dashboard to quickly see a student's persistence toward graduation (successful completion of high school) and the likelihood of being promoted to the next grade level. School personnel can compare one student's likelihood with their peers and more effectively intervene on behalf of a student to increase the probability of promotion. Early Warning can be used with students in grades K-12.
