

Cross-Site Score Groups & Rubrics - Start here

Last Modified on 07/31/2026 2:15 pm CDT

The [Cross-Site Score Groups & Rubrics](#) tool determines how grades are mapped between the Serving School and Home School.

Mapping of score groups is only needed when the two schools use different score groups and rubrics. If the two schools are using the same Score Group/Rubric, mapping is not needed.

Explanation

- Review the [Checklist for Cross-Site Enrollment Setup](#).
- [Cross-Site Enrollment Overview](#)
- [Cross-Site Enrollment Workflow - Video Series](#)

How-to guides

1. [Map individual scores](#) in a score group to their equivalent at the other school.
2. [Connect default score groups](#)
3. [Review and update individual courses](#)
