The **Dependent Care Dashboard** allows users to view current, past, and future sessions. Sessions define the time devoted to a specific childcare period. Users may also view sessions currently in progress. The Dashboard is also used to create new sessions, define the settings that apply to all sessions, edit, and copy sessions.

See the [Dependent Care Dashboard](#) article and related content to learn how to use this tool.

The screenshot shows the 'Dependent Care Dashboard' interface. At the top, there's a breadcrumb trail: 'Dependent Care > Administration > Dependent Care Dashboard'. Below this, the title 'Dependent Care Dashboard' is followed by a star icon. The main section is titled 'Timeframe' and includes tabs for 'Previous', 'Current', 'Upcoming', and 'Draft'. A 'Filter by Session Name' search bar is present with 'Apply Filter' and 'Reset' buttons. The dashboard displays a list of sessions with the following data:

Session Name	Registration Dates	Session Dates	Approved	Pending	Total Sites	Actions

At the bottom, there's a pagination bar showing '1' of 10 items, a dropdown for '10 items per page', and a '1 - 10 of 10 items' indicator. A 'New' button and a 'Settings' link are located at the bottom left.
