Path: Reporting > ND State Reporting > ND Indicator Reports

The North Dakota Indicator Reports report compliance indicator special education data. See the Indicator documents below for additional information:

- Child Outcome Summary Form (Indicator 7)
- Indicator 13

Extract editor

Field	Description	Image
Report Options		
Year Selector *Required*	The year in which to run the report. Only one year can be selected. This defaults to the year selected in the Campus toolbar. When "All Years" is selected in the toolbar, this dropdown defaults to null.	 *The Report Options on the ND Indicator Reports extract editor.*
Grouping	Narrows the report results to either report by Serving District or by Special Education Unit. This defaults to the Serving District option.	
District **Required*	Selection narrows the report results to students in that Serving District. Multiple districts can be selected. Click **Select All** to add all districts to the report results and **Clear All** to clear the selection. *This field is available and required when the Serving District option is selected as the Grouping.	

Field	Description	Image
Special Education Unit **Required*	Selection narrows the report results to students in that Special Education Unit. Multiple units can be selected. Click **Select All** to add all Special Education Units to the report results and **Clear All** to clear the selection. *This field is available and required when the Special Education Unit option is selected as the Grouping.	
Report Type *Required*	The report you would like to generate. Select the links below to view the report layouts for each report type: • Indicator 7 (September 2026) • Indicator 11 (August 2026) • Indicator 12 (September 2026) • Indicator 13 (August 2026)	
Ad hoc Filter	Selecting a pre-existing filter narrows the report results to only students matching that filter. See the Filter Designer article for additional information.	
Output Options		
Report Processing	Choose when to generate the report. The options are **Generate Now** or **Submit to Batch Queue.** Additional **Queue Options** display when Submit to Batch Queue is selected. Submitting to the Batch Queue is useful when generating reports for several calendars or for large volumes of reported data. When selected, users can view report generation progress in the Batch Queue Results section. See the Batch Queue article for more information.	 *The Output Options section of the ND Indicator Reports extract editor.*
Format Type	Determines in which format the report is generated. The only option is CSV.	

Generate an Indicator report

1. Select the school year from the **Year Selector** dropdown.
2. Select the reporting group from the **Grouping** dropdown. Options are Serving District or

Special Education Unit.

3. When "Serving District" is selected as the Grouping, select which district(s) to include in the report from the **District** multi-select field. The Special Education Unit field is not available when "Serving District" is selected as the Grouping.
4. When "Special Education Unit" is selected as the Grouping, select which special education locations to include in the report from the **Special Education Unit** multi-select field. The District field is not available when the "Special Education Unit" is selected as the Grouping.
5. Select which report to generate from the **Report Type** dropdown. Only one report can be generated at a time.
6. Optional: Select a pre-existing **Ad hoc Filter** to narrow report results.
7. Choose when to generate the report: either **Generate Now** or **Submit to Batch Queue**.
8. The CSV output option is already selected. The only **Format Type** available at this time is CSV.
9. Click **Generate**.
