Advanced Attendance

Last Modified on 10/27/2026 8:25 am CDT

Advanced Attendance tools are available with Campus Workflow Suite.

Advanced Attendance improves district staff efficiency and reduces workload for guardians, staff, and students.

Absence Requests

Advanced Attendance provides streamlined tools for submitting and processing absence requests, allowing guardians to submit attendance events through Campus Parent. The attendance office staff then processes these events to create attendance records for students.

Scanners

Scanners allow students to check in to their scheduled class or locations such as the counseling or health office by scanning their student ID at a staff member's workstation or an unattended kiosk.

Behavior Matrix

If school rules assign detention or other consequences for a set number of attendance events (e.g., 10 tardies result in 2 days of lunch detention), the Behavior Matrix can automatically assign those behavior resolutions to students.
