

Events & Actions Tool Rights

Last Modified on 08/28/2026 1:54 pm CDT

Events & Actions is a means to cue/prompt staff when a change occurs that requires staff attention, such as a schedule change, a new student enrolling in the district, or a student leaving the district.

When given rights to Events & Actions, users can also view the list of User Groups available in their district, even if they do not have rights to user groups. However, they cannot see the individual members of the user groups.

See the [Events & Actions](#) article for information on using that tool.

This is a powerful tool requiring technical knowledge of the Campus database. Campus Administrators should assign tool rights to a very limited set of users and only when completely necessary.

Available Tool Rights

Subrights are in *italics*.

R	W	A	D
Access and view the Events & Actions tool.	N/A	N/A	N/A
<i>Events & Actions Configurations</i>			
View the details for existing events and their actions.	Modify existing events and Actions, including changing event conditions, updating targets and adjusting thresholds.	Add new events and actions, and copy the action associated with the event.	Delete events and actions.

Suggested User Groups

See [User Groups and Suggested Roles](#) for more information.
