

Remote Dial-In - Start here

Last Modified on 09/28/2026 2:03 pm CDT

Remote Dial-In allows a district staff member to dial a telephone number and follow a series of prompts to create and send an emergency message when the Campus application is not available.

Remote Dial-In functionality is available to districts that already make use of [Campus Messenger with Voice](#). Remote Dial-In functionality must be requested and has a one-time setup fee.

Getting started

For parents or guardians to receive Emergency messages, they must have the **Emergency** checkbox selected for Voice on the specific phone for which they want to receive them. Staff must have an active District Employment record and have the **Emergency** checkbox selected for Voice on the specific phone for which they want to receive Emergency messages.
