Rx Pack - Campus.2639

Last Modified on 11/06/2026 3:15 pm CST

The following corrections are included in Rx Packs for September 2026. Rx Packs contain a small number of critical cases to fix urgent issues, with delivery in an immediate time frame (e.g., the fix cannot wait for the next four-week Release Pack).

It is recommended that customers apply all subsequent Release Packs immediately following Rx Packs. Doing so will benefit both customers and Infinite Campus when it comes to supporting the patch.

Rx Packs are cumulative; each Rx pack will automatically include all previous Rx packs within that release. These cases will also be included in the Campus.2643 pack unless otherwise noted. Rx Packs may occasionally skip a release number for Rx builds that were not made generally available.

Below is a list of all Rx Packs for Campus.2639 and the date of availability:

- Rx Pack Campus.2639.19 - Friday, November 6, 2026
- Rx Pack Campus.2639.17 - Wednesday, November 4, 2026
- Rx Pack Campus.2639.16 - Friday, October 30, 2026
- Rx Pack Campus.2639.15 - Wednesday, October 28, 2026
- Rx Pack Campus.2639.14 - Friday, October 23, 2026
- Rx Pack Campus.2639.12 - Wednesday, October 14, 2026
- Rx Pack Campus.2639.11 - Thursday, October 8, 2026
- Rx Pack Campus.2639.10 - Wednesday, October 7, 2026
- Rx Pack Campus.2639.9 - Friday, October 2, 2026
- Rx Pack Campus.2639.8 - Wednesday, September 30, 2026
- Rx Pack Campus.2639.7 - Friday, September 25, 2026
- Rx Pack Campus.2639.6 - Thursday, September 24, 2026
- Rx Pack Campus.2639.5 - Wednesday, September 23, 2026
- Rx Pack Campus.2639.3 - Tuesday, September 22, 2026

See the Release Pack Campus.2639 - September 2026 article for a full list of cases included in the Campus.2639 release.

North Carolina - PMR ADM by District (State Edition only) Report (SIS-194500)

The PMR Extract now includes a report for State Edition users only, called ADM by District Rollup, that provides a summary total of Average Daily Membership by Grade Level for in-membership students within the PMR Month.

Path: Reporting > NC State Reporting > NC PMR

North Carolina - PMR Validation Performance Improvements (SIS-202673)

Performance for the Principal's Monthly Report validations has been optimized to reduce processing time and prevent errors in large districts. Additional tuning has been done for the following FATALs to ensure reports complete successfully within the batch queue:

- FATAL-06
- FATAL-13
- FATAL-26

The reporting population for FATAL-06 now references standard reporting population functions and a bug in FATAL-13 that caused failures when selecting a large number of calendars has been resolved.

Path: Reporting > Data Validations

North Carolina - GRS Summary sort order update (SIS-202961)

The GRS Summary Report now displays sort order and group totals in the same manner as the PMR Summary. Pre-kindergarten (PK) grade levels and group totals are now separated from the Kindergarten through grade 13 (KG-13) data.

Path: Reporting > NC Reporting > NC PMR

North Carolina - Updates to initiating the PMR Report (SIS-203811)

Users are no longer permitted to initiate the same PMR report configuration more than once while a previous request is still processing or queued in the Batch Queue. Action buttons are disabled until the current report generation completes or returns an error. This improves system performance and prevents the Batch Queue from becoming overloaded with duplicate report requests.

Path: Reporting > Nc Reporting > NC PMR

North Carolina - PMR Summary and GRS Summary Submission Update (SIS-203825)

Updates have been made to the PMR Summary and GRS Summary submission process to improve accuracy and reliability. If a problem occurs during data sync to State Edition, the submission is reversed, and an error message is displayed to the user.

The synchronization process has also been updated to send only records marked as submitted to State Edition. This prevents records that have not yet been approved from being included during resynchronization.

California - CALPADS Course Section update for Teacher Type 27 (SIS-203013)

The CALPADS Course Section extract has been updated to correctly report teacher job class codes.

Previously, the report included only sections associated with a Teacher Type 27 assignment. The report now also evaluates the ***Itinerant Teacher Assignment*** and ***Pull-Out/Push-In Teacher Assignment*** fields in Section Information when set to Yes.

For compatibility and historical reporting support, the report continues to check for Teacher Type 27 assignments as part of the reporting logic.

North Carolina - LCS Collection - New error messages, Logic updates (SIS-199554)

The following updates have been made to the LCS Collection:

Enhanced Zero-Result Messaging

New validation messages have been added to help users understand why an LCS report returns no results.

- When a school is not required to submit a report because it does not meet LCS reporting population requirements, the system now displays a message indicating that the school is not required to submit the selected snapshot.
- Messaging has also been added for the K-3 Class Size Average Report when a school does not offer grades K-3.

K-3 Class Size Average Reporting

Schools that offer grades K-3 are now able to complete an official K-3 Class Size Average submission even when no reportable sections qualify for reporting. In these cases, the report can be submitted with Class Size Average data elements set to zero rather than preventing submission.

Program Enhancement Teachers Reporting

Schools can now complete an official Program Enhancement Teachers submission when no courses or sections qualify for reporting. When no reportable Program Enhancement Teacher records exist, the report may still be submitted with the applicable Program Enhancement Teacher data elements left blank.

North Carolina - PMR Validations for WARN-6/FATAL-26 plus year-long validations (SIS-202428)

Updates have been made to first-day attendance validation logic and PMR reporting to improve identification of students who are absent on their first instructional day of enrollment and to align validation processing with current reporting standards.

First Day Attendance Logic Updates

- Logic has been updated to evaluate a student's first instructional day of enrollment rather than the enrollment start date when the start date falls on a non-instructional day.
- Students whose enrollment begins on a non-instructional day (such as a weekend) are now evaluated based on their first actual instructional day.
- An Enrollment Start Date column has been added to the report layout.

- The First Instructional Day value now displays the first instructional day of enrollment rather than the enrollment start date.

FATAL-26 Validation Updates

- FATAL-26 validation functionality has been resotred; the previous WARN-06 behavior has been retired.
- FATAL-26 has been updated to use the same reporting population and attendance calculation logic as the PMR Student Day Detail report. The description now reads "Students who are marked absent for more than 50% of the instructional minutes on the first date of their enrollment."
- Students identified as either Absent Att. or Absent Sch. for more than 50% of instructional minutes on their first instructional day of enrollment are now flagged.

Report Layout Updates

- The Student Name field is now two separate columns: Last Name and First Name.
- The Student Day field is now Instructional Minutes.
- The Absent Minutes field is now Present Minutes.
- The Percent Absent field is now Percent Present.

Validation Group Changes

- The M2 Validation Groups to include M1 validation rules.
- Year-Long (YL) PMR Validation Groups and Rules have been inactivated to align validation processing with current PMR requirements.

North Carolina - PMR Summary - Submitted By, SubmittedTimestamp (SIS-203436)

The PMR Summary Extract now includes Submitted By and Submitted Timestamp fields to provide greater visibility into the submission process by capturing who officially submitted a PMR Summary and when the submission occurred.

When users select Submit Verification, the user who submitted the PMR Summary and the date and time it was submitted are captured. Submission details are stored and retained with the PMR Summary record for audit and reporting purposes.

The following updates have also been made to the report layout:

- Verified By is now Reviewed By
- Verified Time is now Reviewed Time

To improve readability, the following audit-related fields have been moved to the far right side of the extract output:

- Generated By, Generated Time
- Reviewed By, Reviewed Time
- Submitted By, Submitted Time

Rhode Island - Enrollment Census Attendance Report updates (SIS-201250)

The Enrollment Census Attendance Report has been updated as follows:

- Attendance code grouping and reporting logic has been updated for Present, Absent, Tardy, Early Dismissal, and Attendance Not Required attendance codes.
- The 1A attendance code is now treated the same as a blank attendance code for reporting purposes. Records are not generated when only 1A or blank attendance codes exist for a reporting period.
- A new MET_MINUTES_REQ field has been added to the report layout. Values are determined using reported attendance records, Group 5 attendance codes, and instructional minutes criteria. This field returns:
  - Y when instructional minute requirements are met
  - N when instructional minute requirements are not met
  - NA when instructional minute requirements do not apply

- Reporting logic now relies on the attendance data entered by administrators. Incorrect or incomplete attendance codes are reported as entered and are not automatically converted or corrected during reporting.

To support accurate reporting of historical attendance records, a one-time script to update attendance excuse records is included with this release. Attendance excuse records are updated when:

- The attendance excuse State Code is blank.
- The selected local attendance code matches an existing code in the attendance excuse State Code dictionary.

This update aligns older rolled-calendar attendance excuse records with current reporting requirements while preserving existing reporting behavior.

Example: If the local attendance code 2B is selected and the State Code is blank, an attendance code of 2B is automatically assigned when a matching State Dictionary entry exists.

Records Transfer Regression Fix (SIS-202840)

The code changes introduced in release 2639 to address a Records Transfer issue caused a regression, resulting in increased database server load for some districts. The regression is due to a change in the query's WHERE clause, which has become less efficient.

The issue has been addressed by restoring a more efficient query structure to improve system performance.

Colorado - Student Interchange Student Demographic updates for 2026-27 (SIS-198025)

The Student Demographic Report has been updated to support state reporting requirements for the 2026–2027 school year. This update introduces the new extract format, adds new demographic and program participation fields, updates header naming conventions, and refines reporting logic for 504 plans, homelessness, and military connections.

Report format

- The 2026–2027 format has been added.
- The 2024-2025 format has been removed.

Pupil Attendance

- A new code has been added for the Pupil Attendance field on the State Reporting Enrollment editor, 99: Not Reportable For Student Collections

Layout & Field Updates

The following new Race/Ethnicity fields have been added to the report. These report a value of 1 when selected for the student's Race/Ethnicity:

- Field 15 - South Asian
- Field 16 - Middle Eastern/North African

The following fields have been added:

- Field 18 - At Risk Status
- Field 20 - Section 504

The following fields have been removed:

- Free Lunch Eligibility

The following fields have updated names:

- Last Name (field 6)
- Free Reduced Lunch Price Eligible (field 17)

- Section 504 Current Status (field 19)
- Homeless (field 25)
- Language Instruction Education Program (field 30)

Logic Updates

The following fields have updated logic:

- Section 504 Current Status (field 19): Reports 1 when the student has a 504 plan active on the extract's Effective Date (start date is on/before the effective date and the end date is on/after the effective date, or end date is blank). Reports 0 when no active plan exists on the effective date.
- Section 504 Year Status (Field 20): Reports 1 when the plan start date is on/before the school year end date and the end date is blank or on/after the school year start date; otherwise reports 0.
- Homeless Status (Field 25): Reports 1 when the student has a homeless record active at any point during the school year (start date on/before the school year end date and end date is blank or on/after the school year start date); otherwise reports 0.
- Military Connected (Field 33): Reports 1 when parent is considered Active Duty at any point during the school year. When a parent/guardian becomes active duty during the school year, the field updates to 1 and remains 1 for the entirety of the school year.

Colorado - At Risk FRAM Audit Data Ad hoc object for Student Demographics reporting (SIS-202375)

To assist Colorado districts in meeting the updated Student Demographic reporting requirements for student At Risk status calculations, a new Ad hoc object, CO At Risk FRAM Audit Data, is

available in the Filter Designer.

This object allows districts to query student enrollment calendars, first instructional days, school lunch provision information, and the latest FRAM eligibility/certification details (including future-dated records) for the active school year. Saved filters created with this object can be used in the Federal/State Program Update Wizard to mass-assign At Risk program participation records prior to generating the Student Interchange – Student Demographic extract.

Users must have tool rights to the FRAM Eligibility Report to access the CO At Risk FRAM Audit Data object.
